Noam,2009-10-19 The concentration of private power over media has been the subject of intense public debate around the world Critics have long feared waves of mergers creating a handful of large media firms that would hold sway over public opinion and endanger democracy and innovation But others believe with equal fervor that the Internet and deregulation have opened the media landscape significantly How concentrated has the American information sector really become What are the facts about American media ownership In this contentious environment Eli Noam provides a comprehensive and balanced survey of media concentration with a methodical scientific approach He assembles a wealth of data from the last 25 years about mass media such as radio television film music and print publishing as well as the Internet telecommunications and media related information technology After examining 100 separate media and network industries in detail Noam provides a powerful summary and analysis of concentration trends across industries and major media sectors He also looks at local media power vertical concentration and the changing nature of media ownership through financial institutions and private equity The results reveal a reality much more complex than the one painted by advocates on either side of the debate They show a dynamic system that fluctuates around long term concentration trends driven by changing economics and technology **Media Ownership and Concentration in America** will be essential reading and a trove of information for scholars and students in media telecommunications IT economics and the history of business as well as media industry professionals business researchers and policy makers around the world Critics and defenders of media trends alike will find much that confirms and refutes their world view But the next round of their debate will be shaped by the facts presented in this book [Global Economic Competition](#) George Kozmetsky,Piyu

Yue,2012-12-06 Global competitiveness has always been a hotly debated issue promoting differing opinions among economists management strategists business leaders and policy analysts and consultants Global Economic Competition provides a broad framework to compare the United States economy with 23 other global economies This is done by presenting empirical evidence in a series of comparative analyses of economic competition using data pertaining to specific countries industries and companies In this volume the electronics industries are used to illustrate an ongoing economic warfare among competing regions nations and cluster companies across the electronic technology chain Employing the latest empirical data to evaluate the competitiveness of the US economy and its electronic industries and companies in the 1980s and early 1990s Global Economic Competition will be of interest not only to those who study economics management science and international trade but also to policy makers and business leaders
