

Main feature of Computerized Auditing Environment

- All tasks are performed **electronically**. In other words, the transactions and events are recorded in electronic records with electronic **evidence**
- Electronic data interchange and online transaction are expanded
- The auditing process is carried out during the year in **continuously** form not at the end of the year.
- Technological techniques such as neural networks to detect fraud and errors in financial statements, and expert systems
- Furthermore, software **agent** could be used to collect the electronic audit evidence
