## **Computers In Our World Today And Tomorrow:**

Living with Computers James W. Cortada, 2020-03-11 The computing technology on which we are now so dependent has risen to its position of ascendancy so rapidly that few of us have had the opportunity to take a step back and wonder where we are headed This book urges us to do so Taking a big picture perspective on digital technology Living with Computers leads the reader on a whistle stop tour of the history of information and information technology This journey culminates in a deep exploration into the meaning and role of computers in our lives and what this experience might possibly mean for the future of human society and the very existence of humanity itself In the face of the transformative power of computing this book provokes us to ask big questions If computers become integrated into our bodies merging with the information processing of our very DNA will computing help to shape the evolution of biological life If artificial intelligence advances beyond the abilities of the human brain will this overturn our anthropocentrism and lead to a new view of reality Will we control the computers of the future or will they control us These questions can be discomfoting yet they cannot be ignored This book argues that it is time to reshape our definition of our species in the context of our interaction with computing For although such science fiction scenarios are not likely to happen any time soon and may in fact never happen it is nevertheless vital to consider these issues now if we wish to have any influence over whatever is to come So humans let s confront our possible destiny James W Cortada is a Senior Research Fellow at the Charles Babbage Institute at the University of Minnesota He holds a Ph D in modern history and worked at IBM in various positions for 38 years including in IBM s management research institute The IBM Institute for Business Value IBV He is the author of over a dozen books on management and nearly two dozen books on the history of information technology These include the Springer title **From Urban Legends to Political Fact Checking Online Scrutiny in America** 1990 2015 with William Aspray **Tomorrow's People and New Technology** Felix Dodds, Carolina Duque Chopitea, Ranger Ruffins, 2021-10-13 As we witness a series of social political cultural and economic changes disruptions this book examines the Fourth Industrial Revolution and the way emerging technologies are impacting our lives and changing society The Fourth Industrial Revolution is characterised by the emergence of new technologies that are blurring the boundaries between the physical the digital and the biological worlds This book allows readers to explore how these technologies will impact peoples lives by 2030 It helps readers to not only better understand the use and implications of emerging technologies but also to imagine how their individual life will be shaped by them The book provides an opportunity to see the great potential but also the threats and challenges presented by the emerging technologies of the Fourth Industrial Revolution posing questions for the reader to think about what future they want Emerging technologies such as robotics artificial intelligence big data and analytics cloud computing nanotechnology biotechnology the Internet of Things fifth generation wireless technologies 5G and fully autonomous vehicles among others will have a significant impact on every aspect of our lives as such this book looks at their potential impact in the entire

spectrum of daily life including home life travel education and work health entertainment and social life Providing an indication of what the world might look like in 2030 this book is essential reading for students scholars professionals and policymakers interested in the nexus between emerging technologies and sustainable development politics and society and global governance
