**Basics of Computerized Accounting** Anshumali Pandey, 2022-11-28 Meaning of Computerized Accounting A computerized accounting system saves a great deal of time and effort considerably reduces if not eliminates mathematical errors and allows for much more timely information than does a manual system In a real time environment accounts are accessed and updated immediately to reflect activity thus combining steps 2 and 3 as discussed in the preceding section The need to test for equality of debits and credits through trial balances is usually not required in a computerized system accounting since most systems test for equality of debit and credit amounts as they are entered If someone were to attempt to input data containing an inequality the system would not accept the input Since the computer is programmed to post amounts to the various accounts and calculate the new balances as new entries are made the possibility of mathematical error is reduced
