[Guide to Computer Network Security](#) Joseph Migga Kizza,2008-12-24 If we are to believe in Moore s law then every passing day brings new and advanced changes to the technology arena We are as amazed by miniaturization of computing devices as we are amused by their speed of computation Everything seems to be in ux and moving fast We are also fast moving towards ubiquitous computing To achieve this kind of computing landscape new ease and seamless computing user interfaces have to be developed Believe me if you mature and have ever program any digital device you are like me looking forward to this brave new computing landscape with anticipation However if history is any guide to use we in information security and indeed every computing device user young and old must brace themselves for a future full of problems As we enter into this world of fast small and concealable ubiquitous computing devices we are entering fertile territory for dubious mischievous and malicious people We need to be on guard because as expected help will be slow coming because rst well trained and experienced personnel will still be dif cult to get and those that will be found will likely be very expensive as the case is today
