Henry W. Fowler, Barton Appler Bean

Body Lines:

Sovereign of the Seas, 1637 John McKay, 2020-02-28 Sovereign of the Seas was the most spectacular extravagant and controversial warship of the early seventeenth century The ultimate royal prestige project whose armament was increased by the King's decree to the unheard of figure of 100 guns the ship finally cost the equivalent of ten more conventional warships A significant proportion of this total was spent on her gilded decoration which gave the ship a unique combination of firepower and visual impact in battle that led her Dutch opponents to dub her the Golden Devil The vessel was the poster child of the notorious Ship Money tax raised without parliamentary approval and so unpopular it was a major factor leading to the Civil War in which Charles I lost his sovereignty and his head In that sense she was a ship that cost a kingdom It is unsurprising that such a high profile ship should be well documented but there are no contemporary plans and much of the visual evidence is contradictory In this book John McKay sets out to analyse the data and reconstruct the design and appearance of the ship in a degree of detail never previously attempted The results are presented as a folio of superbly draughted plans isometric drawings and coloured renderings covering every aspect of the design from the hull form to the minutiae of sails and rigging Each section is accompanied by an explanatory text setting out the rationale for his conclusions so the book will be of value to historians of the period as well as providing superb reference for any modeller tackling one of the most popular of all sailing ship subjects
