Architecture Exam Review: Nonstructural topics Steven E. O'Hara, David Kent Ballast, 2002 The Architect Registration Exam ARE is part of the licensing requirements for U S and Canadian architects. A computerized closed book exam the ARE is administered year round at a network of test centers. The topics represented on the ARE may be roughly divided into two areas structural and nonstructural. We offer two primary study guides for the exam one volume devoted to each area. Each volume includes concise reviews of the exam topics with practice problems and solutions. Additional practice for the ARE is provided by Architecture Exam Review Site Planning and Building Design Graphic Divisions. Volume II Nonstructural Topics provides a thorough review of the ARE nonstructural exam topics including the exam's most challenging divisions. Site Planning and Building Design. More than 80 sample questions are provided with solutions along with a valuable checklist of items that should be considered in every design solution. The book also covers test taking strategy and is enhanced by illustrations figures and tables along with a detailed index. The fifth edition was updated to reflect changes in the exam the adoption of a computerized format and use of the 2000 versions of the International
