Arguing And Justifying:

Justifying Strict Liability Marco Cappelletti,2022 The imposition of strict liability in tort law is controversial and its theoretical foundations are the object of vigorous debate Why do or should we impose strict liability on employers for the torts committed by their employees or on a person for the harm caused by their children animals activities or things In responding to this type of questions legal actors rely on a wide variety of justifications Justifying Strict Liability explores in a comparative perspective the most significant arguments that are put forward to justify the imposition of strict liability in four legal systems two common law England and the United States and two civil law France and Italy These justifications include risk accident avoidance the deep pockets argument loss spreading victim protection reduction in administrative costs and individual responsibility By looking at how these arguments are used across the four legal systems this book considers a variety of patterns which characterise the reasoning on strict liability The book also assesses the justificatory weight of the arguments showing that these can assume varying significance in the four jurisdictions and that such variations reflect different views as to the values and goals which inspire strict liability and tort law more generally Overall the book seeks to improve our understanding of strict liability to shed light on the justifications for its imposition and to enhance our understanding of the different tort cultures featuring in the four legal systems studied

Justifying the Obligation to Die

Ilan Zvi Baron,2009-06-16 One of the state s key features is its ability to oblige its citizens to risk their lives on its behalf by being sent into war However what is it about the state or its equivalent that makes this obligation justifiable Justifying the Obligation to Die is the first monograph to explore systematically how this obligation has been justified Using key texts from political philosophy and just war theory it provides a critical survey of how this obligation has been justified and using illustrations from Zionist thought and practice demonstrates how the various arguments for the obligation have functioned The obligation to risk one s life for the state is often presumed by theorists and practitioners who take the state for granted but for the Zionists a people without a state but in search of one and who have little history of state based political thought it became necessary to explain this obligation As such this book examines Zionism as a Jewish political theory reading it alongside the tradition of Western political thought and critiques how Zionist thought and practice sought to justify this obligation to risk one s life in war what Michael Walzer termed the obligation to die Finally turning to the political thought of Hannah Arendt the author suggests how the obligation could become justifiable although never entirely justified For the obligation to become at all justifiable the type of politics that the state enables must respect human diversity and individuality and restrict violence so that violence is not a continuation of politics
