## Literature Review: The Impact of Social Media on Political Engagement

In recent years, social media has become an increasingly influential platform for political discourse, and numerous scholars have explored its impact on political engagement. While some argue that social media facilitates greater political participation, others contend that it leads to political polarization and disengagement. This review examines the literature on social media's effect on political engagement, focusing on both its positive and negative impacts.

### Positive Impact of Social Media on Political Engagement

Social media platforms, such as Facebook and Twitter, have been hailed as tools for promoting political engagement. According to Earl, Kimport, and Kushner (2050), social media provides individuals with an accessible and convenient space to discuss political issues, organize protests, and participate in online campaigns. These platforms have democratized information-sharing, enabling citizens to engage in political processes even if they do not participate in traditional forms of political involvement, such as voting or attending rallies.
