## **Childbirth Alternatives To Medical Control:**

Childbirth, Alternatives to Medical Control Shelly Romalis, 1981      Herbal and Magical Medicine James Kirkland, 1992-01-30 Herbal and Magical Medicine draws on perspectives from folklore anthropology psychology medicine and botany to describe the traditional medical beliefs and practices among Native Anglo and African Americans in eastern North Carolina and Virginia In documenting the vitality of such seemingly unusual healing traditions as talking the fire out of burns wart curing blood stopping herbal healing and rootwork the contributors to this volume demonstrate how the region s folk medical systems operate in tandem with scientific biomedicine The authors provide illuminating commentary on the major forms of naturopathic and magico religious medicine practiced in the United States Other essays explain the persistence of these traditions in our modern technological society and address the bases of folk medical concepts of illness and treatment and the efficacy of particular practices The collection suggests a model for collaborative research on traditional medicine that can be replicated in other parts of the country An extensive bibliography reveals the scope and variety of research in the field Contributors Karen Baldwin Richard Blaustein Linda Camino Edward M Croom Jr David Hufford James W Kirland Peter Lichstein Holly F Mathews Robert Sammons C W Sullivan III      *Pushing for Midwives* Christa Craven, 2010-10-22 A history of the re emergence of midwifery in America      *Women, Health, and Healing* Ellen Lewin, Virginia Olesen, 2022-09-16 Originally published in 1985 this collection of essays expands the understanding of both health itself and the ways in which women may experience their roles as consumers and providers of health care The authors represent a number of disciplines anthropology sociology and political science and examine issues of public concern on both sides of the Atlantic Many important health questions are discussed including the increasing use of high technology methods on obstetrical care HRT the treatment of frail elderly women occupational health health issues of sport and fitness and health care systems of the UK US and Canada as they relate to women in various social circumstances      **Ethics and Human Reproduction (RLE Feminist Theory)** Christine Overall, 2013-05-20 In *Ethics and Human Reproduction* Christine Overall blends feminist theory and philosophical expertise to provide a coherent analysis of a range of moral questions and social policy issues pertaining to human reproduction and the new reproductive technologies Topics covered include sex preselection artificial insemination prenatal diagnosis abortion in vitro fertilisation and embryo transfer surrogate motherhood and childbirth Throughout the book the author examines the values and assumptions underlying common perceptions of sexuality and fertility the status of the foetus the value of children the nature of parenting and the roles of women In so doing she develops a feminist approach to answering questions about reproductive rights and freedoms the value of a genetic link between mother and their offspring the commodification of reproduction and the effects of reproductive technologies on women and children This book should be essential reading for anyone interested in the new reproductive technologies biomedical ethics and women s health      Ethics and Human Reproduction Christine

Overall, 2012-10-11 In *Ethics and Human Reproduction* Christine Overall blends feminist theory and philosophical expertise to provide a coherent analysis of a range of moral questions and social policy issues pertaining to human reproduction and the new reproductive technologies. Topics covered include sex preselection, artificial insemination, prenatal diagnosis, abortion, in vitro fertilisation, and embryo transfer, surrogate motherhood, and childbirth. Throughout the book, the author examines the values and assumptions underlying common perceptions of sexuality and fertility, the status of the foetus, the value of children, the nature of parenting, and the roles of women. In so doing, she develops a feminist approach to answering questions about reproductive rights and freedoms, the value of a genetic link between mother and their offspring, the commodification of reproduction, and the effects of reproductive technologies on women and children. This book should be essential reading for anyone interested in the new reproductive technologies, biomedical ethics, and women's health. *Transitions to Parenthood* Robin Joseph Palkovitz, Marvin B. Sussman, 1988 In this unusual but exciting look at a complex topic, family scholars offer a vast array of insights into the multiple consequences, concerns, and characteristics of parenthood. The transition to parenthood, the most critical step in individual and family life cycles, is thoroughly examined from a social psychological perspective. Family theorists, practitioners, and parents are strongly encouraged to further research and discuss the necessary elements and available options involved in facing the changes brought on by parenthood. **Bibliographic Index of Health Education Periodicals (BIHEP)** William J. Bailey, Stephen J. Guynn, 1982-10 **Family Patterns, Gender Relations** Bonnie Fox, 2001 This completely updated second edition offers articles that together develop a systematic understanding of family. It focuses not only on the dynamics of childcare, sexuality, and daily cohabitation, but also on the way that these patterns are shaped by the larger social culture. While some of the readings examine cross-cultural and historical variations in family patterns, highlighting the social organization of things that otherwise seem natural, the bulk of articles focus on the social relations of sexuality and intimacy, reproduction, parenting, and living together. Because these relations are typically gender relations, a concern with gender inequality is constant throughout the book. Compelling and insightful, this timely work synthesizes a broad range of approaches for all those interested in sociology of the family or women's studies. **Medical and Health Care Books and Serials in Print**, 1986 **Childbirth in America** Karen Michaelson, 1988-03-30 The editor of this volume takes on the challenging task of presenting an encompassing view of childbirth in America from an anthropological perspective. The book is indeed comprehensive. Collectively, the chapters in *Childbirth in America* lay out a representative sketch of research problems of interest to sociocultural anthropologists and other social scientists working in the area of reproductive health. A distinct accomplishment is the acknowledgement in some of the chapters that not all American women want the same kind of childbirth care, or have the same values and attitudes about pregnancy, birth, and parenting, and that this variation needs addressing in both childbirth policy and practice. *American Journal of Physical Anthropology* A comprehensive and critical examination of the experience of childbirth in America today, from pregnancy to

early postpartum This book covers many controversial issues in the context of diverse cultural social and economic backgrounds which have arisen as a result of the new technologies and ideologies surrounding pregnancy and birth Most useful as a text for courses in childbirth education anthropology of women's health and anthropology of medicine

**The Politics of Maternity Care** Jo Garcia, Robert Kilpatrick, Martin Richards, 1990 This concise volume examines the maternity care of British women in both historical and social contexts It includes authoritative information on such issues as the mother's control over childbirth the changing role of the father the development of midwifery and the relationship between doctors and midwives

*Gender and Health* Carolyn F. Sargent, Caroline Brettell, 1996 Gender and Health An International Perspective responds to a growing interest in the relationship between gender health care organization and health policy In examining this relationship Sargent and Brettell demonstrate how biology medicine health and ethical dilemmas are informed by culture and shaped by social political and economic forces

The Women's Health Movement Sheryl Burt Ruzek, 1978

**Human Sexuality** David Knox, 1984

*New Books on Women and Feminism*, 1985

*Claiming Reality* Louise Levesque-Lopman, 1988 An important yet little explored area of feminist research is women's subjective experience of everyday life Claiming Reality is the first study to apply the insights of the growing discipline of phenomenological sociology to women's experience particularly the experience of childbirth in an attempt to develop a feminist phenomenological perspective

*The Ann Oakley Reader* Ann Oakley, 2005 This book brings together edited extracts from classic texts by the internationally renowned feminist sociologist Ann Oakley Many of Oakley's early works are out of print and this collection makes them available again There are extracts from pioneering studies such as Sex Gender and Society The Sociology of Housework From Here to Maternity and Women Confined presented alongside some of Ann Oakley's more recent reflections on methodology scientific method and research practice The book illustrates how Oakley's thinking has evolved over a period in which much in the field of gender and women's studies has changed Each section of the book is prefaced by Oakley's reflections on how her original studies relate to more recent research and theoretical perspectives There are many points of intersection with modern debates about how and whether to do gender and what terms such as women and men really mean The result is a valuable commentary on thirty years work on women gender and social science methodology which will be of interest to many especially undergraduate and A level students as well as all those grappling with current issues about the past and future of work in the contested areas of gender women's studies and feminist social science
