Zealand and Australia are broadly considered to be countries in which sustainability and responsibility discourses are being pursued by governments and business alike and in which incentives and initiatives are helping confront and overcome sustainability related challenges This book takes a closer look behind and beyond the marketing mantras of both Australia s and New Zealand s clean and green campaigns and on the basis of representative examples and cases critically evaluates the status quo The book assesses the effectiveness of sustainability and responsibility models with a focus on the South Pacific and argues that the ways in which issues have been dealt with in this more closely defined geographical region are most likely a good indicator of how similar issues are or soon will be dealt with around the globe As such the book offers a rich source of cases on sustainability and responsibility in the business arena a critical review and an inspirational affirmation of responsible business practice

Pacific Poultrycraft ,1928 [The Clean Green Dragon](#) Rebecca Bielawski,2022-01-30 So there was this dragon Yeah he was mighty with all the power of the sun and the earth at his wingtips but he was also a little lazy One day an annoying problem washed up on his doorstep Well no it was more than annoying it was downright disgusting The question is would he get off his scaly butt and do something about it A fun tale that tells us to look over our shoulder every once in a while to check if we are leaving this planet better or worse than we found it From the author I was trying to write a legend As if once there was a planet with an environmental problem and this is how it was solved and now it is just a story that we tell to our children like children used to sweep chimneys for a job and we used to throw rubbish in the sea but then we stopped because it was dumb I wrote a fun simplistic story about our responsibilities to the environment specifically about single use plastics one of our most ridiculous inventions ever and how our oceans are expected to wash it all away
