that coherence on the topics mentioned is established. One of the main aspects drawn in this book and addressed by several authors in the book is the use of the Community of Inquiry (CoI) framework when implementing teaching and learning strategies in blended learning environments to foster self-directed learning. This notion of focusing on the CoI framework is particularly evident in both theoretical and empirical dissemination presented in this book. What makes this book unique is the fact that researchers and peers in varied fields would benefit from the findings presented by each chapter, albeit theoretical, methodological, or empirical in nature. This in turn provides opportunities for future research endeavours to further the narrative of how blended learning environments can be used to foster self-directed learning.

The School Climate Improvement "Process" National School Climate Center (NSCC), 2012. Student learning and development are a function of both individual and systemic factors. Individual factors include students' motivation as well as their intellectual and social abilities. Systemic factors include teacher quality, administrative leadership, community engagement, and learning environments. The increasing numbers of children living in poverty and rapidly changing ethnic demographics are critical contextual factors that must be addressed in creating positive school climates for all. The National School Climate Council defines school climate as the quality and character of school life. School climate is a multidimensional concept that reflects the norms, goals, values, interpersonal relationships, teaching and learning practices, safety, and organizational structures of a school community. School climate improvement is an intentional, strategic, collaborative, transparent, and coordinated effort to strengthen school learning environments. Democratically informed decision-making constitutes an essential foundation for the school climate improvement process. Based on members' collective experience, partnering with schools, the Council defines an effective school climate improvement process as one that engages all stakeholders in six essential practices. The six essential practices and glossary of terms are presented in this brief.
