Climates Of Our Birth:

The Birth Control Review Margaret Sanger,1927 *Weather, Climate, and the Geographical Imagination* Martin Mahony,Samuel Randalls,2020-03-24 As global temperatures rise under the forcing hand of humanity's greenhouse gas emissions new questions are being asked of how societies make sense of their weather of the cultural values which are afforded to climate and of how environmental futures are imagined feared predicted and remade *Weather Climate and Geographical Imagination* contributes to this conversation by bringing together a range of voices from history of science historical geography and environmental history each speaking to a set of questions about the role of space and place in the production circulation reception and application of knowledges about weather and climate The volume develops the concept of geographical imagination to address the intersecting forces of scientific knowledge cultural politics bodily experience and spatial imaginaries which shape the history of knowledges about climate **The Journal of State Medicine** ,1899 **The Medical Press & Circular** ,1881 **Annual Report ... on the Registration of Births and Deaths, Marriages and Divorces, in Michigan** ,1881 Report on the Census of British India, Taken on the 17th February 1881 India. Michigan. Department of Health,1881 *Birth Chairs, Midwives, and Medicine* Amanda Carson Banks,2009-10-20 There was a time when birth was treated as a natural process rather than a medical condition Before 1800 women gave birth seated in birth chairs or on stools and were helped along by midwives Then societal changes in attitudes toward women and the practice of medicine made birthing a province of the male dominated medical profession In *Birth Chairs Midwives and Medicine* Amanda Carson Banks examines the history of the birth chair and tells how this birthing device changed over time Through photographs artists renditions of births interviews and texts from midwives and early obstetricians she creates an evolutionary picture of birthing practices and highlights the radical redefinition of birth that has occurred in the last two centuries During the 1800s the change from a natural philosophy of birth to a medical one was partly a result of heightened understandings of anatomy and physiology The medical profession was growing and with it grew the awareness of the economic rewards of making delivery a specialized practice In the background of the medical profession's rise was the prevailing perception of women as fragile invalids Gradually midwives and birth chairs were relegated to rural and isolated settings The popularity of birth chairs has seen a revival in the late twentieth century as the struggle between medical obstetrics and the alternative birth movement has grown As Banks shows through her careful examination of the chairs themselves these questions have been answered and reconsidered many times in human history Using the artifacts from the home and medical office Banks traces sweeping societal changes in the philosophy of how to bring life into the world **The Medical and Surgical Reporter** ,1887 **Monthly Bulletin of Agriculture Intelligence and of Plant-diseases** International Institute of Agriculture.
