**Red Capitalism in South China** George C.S. Lin,2011-11-01 This book describes the dramatic economic and spatial transformation in China s Pearl River Delta region over the past decade Reforms introduced by the Chinese government since 1978 were the cause of this transformation The Pearl River Delta has had the highest recorded rate of economic growth in East Asia and has done so through a pattern of development which differed significantly from that found in other regions of fast growth George Lin reviews the processes by which this remarkable transformation was achieved and discusses the implications of such change Red Capitalism in South China looks at theories of regional development and the patterns of spatial and economic restructuring in the Delta and provides three case studies which focus on the transformation of the peasant economy transport development and the influence of Hong Kong This book represents the best account yet available of the implications of change in South China It examines a phenomenon of particular importance not only because the speed and magnitude of changes taking place in the region are truly fascinating but also because its patterns of growth and development are distinct from those of the Western capitalist world or the former Soviet Union and Eastern Europe

**What's A Peasant To Do? Village Becoming Town In Southern China** Greg Guldin,2018-05-04 Since China entered the post Mao Reform Era in the late 1970s and early 1980s the Chinese economy has taken off as few economies ever have Labor migration rural enterprises rising production and globalization have all combined to end the isolation of the Chinese countryside Yet although China s unsurpassed economic boom has produced reams of impressive statistics has this economic growth led to improving the livelihood of the average Chinese person Has development accompanied economic growth Has the promise of opening to the outside been fulfilled in providing a better life for China s 1 2 billion plus people In this book which is based on field work Guldin presents and explores some of the changes sweeping through China in the 1990s that are affecting hundreds of millions of people Guldin looks at the growth of town and village enterprises labor mobility and the other aspects of rural urbanization to investigate the connection between economic growth and development in contemporary China The political changes at the village level the swelling flows of capital data goods and people new ways of thinking and behaving and a significant surge in social inequalities are all topics for chapter discussions Guldin invites readers to face the same question that former Chinese peasants must face namely how to respond as their villages are transformed forever

**Stature and Economic Development in South China, 1810-1880** Stephen L. Morgan,2010 Foreign influence on South China increasingly disrupted the economy from the late eighteenth century Many scholars believe the standard of living fell while others point to positive gains from increased integration with the world economy The paper estimates the secular trend in the average

height of the southern Chinese in the nineteenth century based on data from prison registers in colonial Australia. Contrary to the pessimist view, height began to decline obviously only from the 1850s, a product of the dislocation effects of revolts and rebellions. At 163-164 cm, the Chinese were of similar stature to the military conscripts of some European countries in the early to mid-nineteenth century.

**Transport Development in Southern China** Peter Cook, Edward Holland, 1992. This study is focused on delineating the nature and future transport system which best serves Guangdong's economic requirements and on identifying some of the measures needed to achieve such a system. A central question is the economic role of the different modes of transport: rail, road, water, and air. In addressing this question, the study seeks to lay a foundation for systematic comparison of the costs of the different modes for four major traffics: a) passengers, b) coal, c) heavy freight, and d) less than carload shipments. It estimates financial and economic cost functions for each on the assumption that investments in the network would employ the best of existing modern technology as appropriate to China's resource endowments. Principal findings of these comparative cost and price analyses are: 1) highway economic costs are likely to fall as China and Guangdong province move toward a modern road transport system; Rail prices may also fall but by much less since the railways are currently much closer to the efficiency frontier; 2) tariff increases for coal were not sufficient to close the gap between tariffs and economic costs; 3) increases in costs of coastal shipping have eroded the comparative advantage of that mode in economic terms vis a vis all rail movements of coal; and 4) tariff increases for rail passengers have eliminated subsidies and should encourage passengers to shift to bus transport which is more efficient for short distances.

**Imperial Gateway** Seiji Shirane, 2022-12-15. In *Imperial Gateway*, Seiji Shirane explores the political, social, and economic significance of colonial Taiwan in the southern expansion of Japan's empire from 1895 to the end of World War II. Challenging understandings of empire that focus on bilateral relations between metropole and colonial periphery, Shirane uncovers a half century of dynamic relations between Japan, Taiwan, China, and Western regional powers. Japanese officials in Taiwan did not simply take orders from Tokyo; rather, they often pursued their own expansionist ambitions in South China and Southeast Asia. When outright conquest was not possible, they promoted alternative strategies including naturalizing resident Chinese as overseas Taiwanese subjects, extending colonial police networks, and deploying tens of thousands of Taiwanese to war. The Taiwanese merchants, gangsters, policemen, interpreters, nurses, and soldiers seized new opportunities for socioeconomic advancement that did not always align with Japan's imperial interests. Drawing on multilingual archives in six countries, *Imperial Gateway* shows how Japanese officials and Taiwanese subjects transformed Taiwan into a regional gateway for expansion in an ever-shifting international order.
