a big need for a new children's literacy series and believed they could create a new show with local and national collaborators and friends. After fits and starts and enough twists and turns to fill a children's book, Reading Rainbow premiered in the summer of 1983 and captured the attention of 6.5 million young viewers. Creating Reading Rainbow explores the many intriguing and homespun stories that when woven together reveal how this groundbreaking and iconic television series came to be. What led to the series being called Reading Rainbow? How did the road to Reading Rainbow wind its way through Mister Rogers' Neighborhood? How did a public television station in Buffalo spearhead a movement in education and spark the passion for reading in millions of children? And what does lasagna have to do with it?

Calling for structured interaction between students and books, Leonard specifies how teachers and media specialists can collaborate to create a library media centered program that develops the talents of all K-6 students. The ultimate goal is to encourage reading and build reading comprehension, questioning and thinking skills. Models, groupings, strategies and materials are suggested in a grade appropriate scope and sequence. The latest theories about the process of education, thinking, multiple intelligences, how children learn individually and cooperatively, as well as effective grouping and teaching strategies for differentiation are discussed. The book also has sample lessons and scenarios drawn from the author's experience. Grades K-6 Signatures, 1997 School Library Journal, 1994
