Architects of American Air Supremacy Dik A. Daso,2002-04-01 The United States Air Force is the most technologically advanced service in the world Stealth precision global range and space systems are only a few of the hallmarks of the USAF technology Airborne laser weapons super accurate sensors and hypersonic aircraft are already in the early stages of development Creations such as these are not the product of stagnant minds or idle hands It was in 1944 that General of the Army Herny H Hap Arnold established the Army Air Forces AAF Scientific Advisory Group SAG under the direction of Dr Theodore von Karman The SAG

meticulously created the first science and technology forecast ever accomplished in military history The study predicted many of the developments in aviation technology which today most Americans take for granted Some of the more outstanding of these are supersonic flight precision weaponry accurate radar and the development of intercontinental ballistic missiles ICBM In Architects of American Air Supremacy Dik Daso tells the story of the founding of the scientific and technical base of today's USAF But this work is much more than simply a history of technology The SAG was a culminating point reached only after many years of building interpersonal relationships developing industrial bonds and tapping the wisdom of America's most influential scientists In large measure this book reflects the symbiotic nature of the military and the society which it serves This book is an introduction to the very nature of the USAF a service founded in aviation science and technology and built by great commanders innovators and dedicated men and women in the service of their nation Ronald R
