## **Architecture In Continuity:**

*Architecture in Continuity* Sherban Cantacuzino, 1985 Architecture in Continuity celebrates recent projects throughout the Islamic world that most successfully preserve indigenous forms while providing for the future It honors the insight imagination and skill that brought these projects into physical reality The Aga Khan Awards Foundation's attention to the extraordinary effort required to develop an architecture both practical and spiritual is dramatically reflected in this volume The eleven projects found in nine countries from Mali to Pakistan from Yugoslavia to Malaysia range from hotels to mosques from housing to an impressive air terminal for pilgrims to Mecca The introduction and three essays by distinguished architects and architectural historians explore the projects in terms of the pressures confronting emerging Muslim countries the influence of the Western postindustrial world and traditional Muslim forms and values

**The Architecture of Continuity** Lars Spuybroek, 2008 That buildings are made of elements doesn't mean that architecture should be based on elementarism on the contrary we should strive for an architecture of continuity that fuses tectonics with textile abstraction with empathy and matter with expressivity This is the crux of the argument Lars Spuybroek makes in this book the first fully theoretical account of his innovative work The state of contemporary architecture is the product of a 150 year battle between the Polytechnique and Beaux Arts schools of design which has forced us into a stalemate between the radically opposed positions of high tech and sculpturism Spuybroek aims to do no less than mend this rift through rethinking technology as an extension of our feeling senses materiality as the realm of activity and agency and structure as the result of genesis Building on Gottfried Semper's materialist theory of architecture he takes us from a philosophy of technology to a surprisingly historical argumentation that constantly revives the words of John Ruskin William Hogarth and Wilhelm Worringer Alongside a number of essays the book contains extensive conversations in which we witness him refining and sharpening his arguments We will see a merging of Art Nouveau and Bauhaus where empathy has been liberated from manual labor and machines have been liberated from uniform repetition In a period of theoretical tranquility in architecture this book takes a refreshing turn back to the basics one in which tools methodology and architectural aesthetics are recalibrated
