Architectures For Enterprise Integration:

Architectures for Enterprise Integration Peter Bernus, Laszlo Nemes, Theodore J. Williams, 2013-04-17 Architectures for Enterprise Integration describes the latest methods to guide enterprises and consultants managers and technical personnel through a complete life cycle of enterprise development This book is based on the findings of the IFIP IFAC Task Force and presents the state of the art in enterprise architecture This book is essential reading for all practising engineers and researchers in manufacturing and engineering management with special interest for those involved in CIM and Enterprise Modelling and Integration

Enterprise Integration Fred Cummins, 2002-02-14 As enterprise integration typically consumes huge portions of IT budgets companies increasingly turn to component technologies such as Enterprise JavaBeans and CORBA to streamline business processes for corporate wide decision support Taking readers from business objectives to computer code in a series of detailed practical examples this book shows developers how to use component technologies to integrate applications to better serve business needs

Handbook on Enterprise Architecture Peter Bernus, Laszlo Nemes, Günter J. Schmidt, 2003-09-11 This handbook is about methods tools and examples of how to architect an enterprise through considering all life cycle aspects of Enterprise Entities It is based on ISO15704 2000 or the GERAM Framework A wide audience is addressed as the handbook covers methods and tools necessary to design or redesign enterprises as well as those necessary to structure the implementation into manageable projects

Service-Driven Approaches to Architecture and Enterprise Integration Ramanathan, Raja, 2013-06-30 While business functions such as manufacturing operations and marketing often utilize various software applications they tend to operate without the ability to interact with each other and exchange data This provides a challenge to gain an enterprise wide view of a business and to assist real time decision making Service Driven Approaches to Architecture and Enterprise Integration addresses the issues of integrating assorted software applications and systems by using a service driven approach Supporting the dynamics of business needs this book highlights the tools techniques and governance aspects of design and implements cost effective enterprise integration solutions It is a valuable source of information for software architects SOA practitioners and software engineers as well as researchers and students in pursuit of extensible and agile software design

Knowledge Sharing in the Integrated Enterprise Peter Bernus, Mark Fox, 2005-09-20 Enterprise Architects in their endeavor to achieve Enterprise Integration have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice It is widely recognized that the practice of engineering enterprises needs a number of models but how to maintain the relation between these models with ease is still a problem Model interoperability is an issue on multiple counts How to interchange models between enterprise modeling tools How to maintain the interdependencies between models whether they describe the enterprise on the same level but from different points of view or from the same point of view but on different levels of abstraction and granularity How to maintain a coherent and evolving set of enterprise models in support of continuous

change processes How to use and reuse enterprise models as a knowledge resource The answers to these questions are of great importance to anyone who is implementing ISO9001 2000 requirements whether through using enterprise architecture practice or not although it can be argued that a well executed architecture practice should satisfy ISO9001 without additional effort This volume attacks the problem on three fronts 1 Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration 2 Authors who are practitioners of or conducting active research in enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies 3 Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology ICEIMT 04 and those presented at the Design of Information Infrastructure Systems for Manufacturing DIISM 04 Workshop While DIISM is traditionally oriented at supporting manufacturing practice the results have a far greater domain of applicability
