Gil, 1970 For this volume Gil examines and interprets a series of nationwide studies of child abuse that were initiated in 1965 in an attempt to unravel the context of social and cultural forces with which violent behavior against children is associated He begins with a definition Physical abuse of children is the intentional nonaccidental use of physical force or intentional nonaccidental acts of omission on the part of a parent or other caretaker interacting with a child in his care aimed at hurting injuring or destroying that child With an approach that is epidemiologic social and cultural rather than clinical and psychological he compiles findings from press and public opinion surveys from analyses of nearly 13 000 incidents of child abuse reported through legal channels across the country during 1967 and 1968 and from a comprehensive study of more than 1300 incidents reported in a representative sample of cities and counties He deals with incidence and community response rather than with case histories The findings Gil maintains suggest that violence against children is rooted in culturally determined theories and practices of child rearing with a higher incidence among the lower educational and socioeconomic strata of society among broken families and among families with four or more children He concludes that perhaps the most serious form of child abuse is that inflicted by society rather than by parents and guardians This societal abuse is manifested by the statistics on infant mortality hunger and malnutrition poverty inadequate medical care poor

education and officially sanctioned physical abuse in schools correctional institutions child care facilities and juvenile courts The author further concludes that American culture encourages the use of a certain measure of physical force in rearing children Straightforward and clearly presented Gil s book also suggests a typology of child abuse and recommends a set of structural measures and policies designed to reduce the incidence of abuse through an attack on its apparent roots within the fabric of society

The Politics of Child Abuse in America Lela B. Costin, Howard Jacob Karger, David Stoesz, 1996 Child abuse policy in the United States contains dangerous contradictions which have only intensified as the public slowly accepted it as a middle class problem One contradiction is the rapidly expanding child abuse industry made up of enterprising psychotherapists and attorneys which is consuming enormous resources while thousands of poor children are seriously injured or killed many while being protected by public agencies This rediscovery has also led to the frenzied pursuit of offenders resulting in the sacrifice of some innocent people Moreover the media's focus on the sensational details of high visibility sexual abuse cases has helped to trivialize if not commercialize the child abuse problem As such child abuse has gone from a social problem to a social spectacle By the 1980s the child welfare system had become a virtual nonsystem marked by a staggering turnover of staff unmanageable caseloads a severe shortage of funding and caseloads composed of highly dysfunctional families many with drug related problems To make room for these families public agencies rationed services by increasingly screening out child abuse reports which contained little likelihood of serious bodily harm In *The Politics of Child Abuse in America* the authors argue that child abuse must be viewed as a public safety problem This redefinition would make it congruent with other family based social trends including the crackdown on domestic violence Children must have the same legal protection currently extended to physically and sexually abused women This can be done by creating a Children's Authority which would have the overall charge for protecting children Specifically Children's Authorities would have the responsibility for providing the six main functions of child protection investigation
