Devastation And Renewal:

Devastation and Renewal Joel A. Tarr, 2004-08-11 Every city has an environmental story perhaps none so dramatic as Pittsburgh's. Founded in a river valley blessed with enormous resources—three strong waterways, abundant forests, rich seams of coal—the city experienced a century of exploitation and industrialization that degraded and obscured the natural environment to a horrific degree. Pittsburgh came to be known as the Smoky City or, as James Parton famously declared in 1866, hell with the lid taken off. Then came the storied Renaissance in the years following World War II when the city's public and private elites, abetted by technological advances, came together to improve the air and renew the built environment. Equally dramatic was the sweeping deindustrialization of Pittsburgh in the 1980s when the collapse of the steel industry brought down the smokestacks, leaving vast tracks of brownfields and riverfront. Today Pittsburgh faces unprecedented opportunities to reverse the environmental degradation of its history. In *Devastation and Renewal*, scholars of the urban environment post questions that both complicate and enrich this story. Working from deep archival research, they ask not only what happened to Pittsburgh's environment but why. What forces—economic, political, and cultural—were at work? In exploring the disturbing history of pollution in Pittsburgh, they consider not only the sooty skies but also the poisoned rivers and creeks, the mined hills, and scarred land. Who profited and who paid for such progress? How did the environment Pittsburghers live in come to be, and how can it be managed for the future? In a provocative concluding essay, Samuel P. Hays explores Pittsburgh's environmental culture, the attitudes and institutions that interpret a city's story, and work to create change. Comparing Pittsburgh to other cities and regions, he exposes exaggerations of Pittsburgh's environmental achievement and challenges the community to make real progress for the future. A landmark contribution to the emerging field of urban environmental history, *Devastation and Renewal* will be important to all students of cities, of cultures, and of the natural world.

Bessie Head's writing illustrates a fusion of styles, subjects, and philosophical and literary influences. This book explores this range by drawing both on postcolonial and feminist theories. Focusing on Head's acute sensitivity to social and historical experiences, the book deals with Head's use of myths and trans-cultural fictions that convey knowledge about her immediate world and the historical domains beyond it. In addition, Bessie Head's autobiographical vision generates an exploration of personal injustices as well as the processes they signal. Hinduism and eastern philosophy were central to Head's philosophical vision, and the book shows how this vision allowed her to explore existential questions and spiritual concerns in innovative and unexpected ways. By using language auto-referentially and symbolically, by drawing on myths, and by developing abundantly textured metaphors, Head produces fictions that manifest the notions of freedom and serenity she urgently endorses and that are as concerned with challenging the realities she confronts as they are with utopian imagining.
