Halstead, Takayasu Ito, 1993-11-03 Parallel and distributed computing are becoming increasingly important as cost effective ways to achieve high computational performance Symbolic computations are notable for their use of irregular data structures and hence parallel symbolic computing has its own distinctive set of technical challenges The papers in this book are based on presentations made at a workshop at MIT in October 1992 They present results in a wide range of areas including speculative computation scheduling techniques program development tools and environments programming languages and systems models of concurrency and distribution parallel computer architecture and symbolic applications *Languages for Developing User Interfaces* Brad A. Myers, 1992-11-02 This book brings together a number of researchers and developers from industry and academia who report on their work It is of interest to language designers and the creators of toolkits UIMs and other user interface tools [ACM Transactions on Programming Languages and Systems](#) Association for Computing Machinery, 2003 Contains articles on programming languages and their semantics programming systems storage allocations and garbage collection languages and methods for writing specifications testing and verification methods and algorithms specifically related to the implementation of language processors *Programming Languages and Systems* Gert Smolka, 2000-03-15 ETAPS 2000 was the third instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprised ve conferences FOSSACS FASE ESOP CC TACAS ve satellite workshops CBS CMCS CoFI GRATRA INT seven invited lectures a panel discussion and ten tutorials The events that comprise ETAPS address various aspects of the system development process including specification design implementation analysis and improvement The languages methodologies and tools which support these activities are all well within its scope Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other Many of the issues involved in software design apply to systems in general including hardware systems and the emphasis on software is not intended to be exclusive **High Performance Computing in Science and Engineering '99** E. Krause, W. Jäger, 2012-12-06 The book contains reports about the most significant projects from science and engineering of the Federal High Performance Computing Center Stuttgart HLRS They were carefully selected in a peer review process and are showcases of an innovative combination of state of the art modeling novel algorithms and the use of leading edge parallel computer technology The projects of HLRS are using supercomputer systems operated jointly by university and industry and therefore a special emphasis has been put on the industrial relevance of results and methods
