## **Adam And Evolution:**

**Adam and Eve Versus Evolution** Ronald Conte,2014-10-18 This book argues in favor of Adam and Eve as two real historical persons and also in favor of accepting evolution as one of the natural means that God uses to guide the unfolding of His Creation Adam and Eve were created by God miraculously and they became the first parents of the entire human race But God used evolution under His providence to prepare the form of the human body Then God miraculously created Adam and Eve as the first two true human persons and He gave them immortal souls with free will and reason Some Christians reject evolution and other scientific theories adhering instead to an entirely literal interpretation of the Book of Genesis Others reject the historicity of Genesis as if it were merely a collection of fictional teaching stories When faith and science disagree how should faithful Christians respond We cannot reject the truths of our faith But neither should we reject the gift of reason and the insights of modern science Therefore this book proposes that both the story of Adam and Eve and the theory of evolution are essentially true when properly understood The early chapters of Genesis contain some literal historical elements along with many figurative elements Adam and Eve were two literal historical persons They each fell from grace by committing the first sins of the human race original sin But other elements of their story are figurative including a forbidden fruit and a talking serpent And the seven days of Creation are also figurative not literal The theory of evolution in its main tenets is compatible with this approach to the Bible which sees both literal and figurative elements woven together in a single tapestry of truth God created the universe and He may well have done so in the manner described by science God chose to create life on Earth but that life developed and progressed largely as the theory of evolution explains In addition God s Providence has always guided Creation as a whole and particularly life on Earth He who created all things also created the principles of nature God gave the principles of nature the role of governing the development of the universe as well as the development of life on Earth For such is His plan for His Creation Science has the role of discovering the inherent principles of all natural things But science must not speak or act as if it were the judge over Faith The theory of evolution fails on a few points Evolution ignores the role of God in creating the first life on Earth in governing the development of living things and in choosing to create the human race The idea that one species can evolve into another species is well proven but the claim that life evolved from non living chemicals is not I believe that God intervened directly to create the first single cell organisms on Earth Subsequently evolution under the providence of God developed that life over the course of billions of years into a vast array of plants and animals But evolution eventually reached a glass ceiling after the development of the higher forms of animal life For no natural principle is able to evolve or create an immortal soul with free will and the ability to reason abstractly And so God intervened miraculously to create the first two human persons Adam and Eve After they fell from grace these two became the parents of the whole human race All human persons on Earth are descended from Adam and Eve

**The Evolution of Adam** Peter Enns,2012-01-01 Can Christianity and evolution coexist Traditional Christian

teaching presents Jesus as reversing the effects of the Fall of Adam. However, an evolutionary view of beginnings doesn't allow for a historical Adam, making evolution seemingly incompatible with what Genesis and the apostle Paul say about him. For Christians who accept evolution and want to take the Bible seriously, this presents a faith-shaking tension. Peter Enns, an expert in biblical interpretation, offers a way forward by explaining how this tension is caused not by the discoveries of science but by false expectations about the biblical texts. Focusing on key biblical passages in the discussion, Enns demonstrates that the author of Genesis and the apostle Paul wrote to ask and answer ancient questions for ancient people; the fact that they both speak of Adam does not determine whether Christians can accept evolution. This thought-provoking book helps readers reconcile the teachings of the Bible with the widely held evolutionary view of beginnings and will appeal to anyone interested in the Christianity/evolution debate.

The Evolution of Adam Peter Enns, 2012. The widely held evolutionary view of beginnings doesn't allow for a historical Adam. This book helps Christians reconcile the teachings of the Bible and evolution.

*Searching for Adam* Dr. Terry Mortenson, 2016-10-01. Though there are a growing number of books out on Adam, this one is unique with its multi-author combination of biblical, historical, theological, scientific, archaeological, and ethical arguments in support of believing in a literal Adam and the Fall. A growing number of professing evangelical leaders and scholars are doubting or denying a literal Adam and a literal Fall, which thereby undermines the gospel of Jesus Christ, the Last Adam, who came to undo the damaging consequences of Adam's sin and restore us to a right relationship with our Creator. This book increases your confidence in the truth of Genesis 1:11 and the gospel. Enhance your understanding pertaining to the biblical evidence for taking Genesis as literal history. Discover the scientific evidence from genetics, fossils, and human anatomy for the Bible's teaching about Adam. Understand the moral, spiritual, and gospel reasons why belief in a literal Adam and Fall are essential for Christian orthodoxy.

The Death of Adam John C. Greene, 1996. *Adam and Evolution* Michael Pitman, 1984. Adam and Evolution Michael Pitman, 1987. **Adam and Evolution** William Pearson, 2021-08-31. Let us start with the obvious: Living matter, having once emerged from obscure beginnings on this planet Earth, the home selected for it in the Universe, has continued to exist in countless different forms right to the present time. As a means to cope with the enormous diversity involved, natural scientists have created a comprehensive classification system. This enables one to get a grasp of the complexities of the chronological and biological relationships that all forms of life bear to one another. It is called the Linnaean System, named after Carl von Linné, its Swedish instigator. This is known more generally as taxonomy, and the immediately following discourse is by way of a résumé to aid those to whom it is not entirely familiar. Yet is it ultimately a completely satisfactory method? Will it ever be able to explain all aspects of evolution? In later chapters, there will be some discussion on this matter, and suggestions made that are meant to clarify points that hitherto have been inexplicable.
