Carpenter,HUMAN RESOURCES RESEARCH ORGANIZATION ALEXANDRIA VA.,1967 The aim of the course is to provide understanding of fundamental computer programming concepts and more important to develop a proficiency in writing elementary computer programs The material was originally drawn from the U S Army s course for the Automatic Data Processing Specialist ADPS Programing Specialist MOS 745 1 The criterion problems

contained in the course were chosen from actual job situations but scaled down to fit the instructional repertoire of the course. The course is self-contained and consists of an instruction booklet and an answer booklet. It is directed toward the level of high school seniors and first-year college students. In its various experimental forms, it was administered to a total of nearly 900 high school juniors and seniors and, after final revision, to a small sample of college freshmen and high school seniors. Findings from the several experimental administrations of the course clearly pointed to the desirability of teaching the course with a variety of kinds of computer problems. Results indicated that students learned from making errors and thus required hints or correct answers in solving the practice problems only a small part of the time.
