Comprehension Strategies in the Acquiring of a Second Language Harris Winitz, 2020-10-08 This book provides a critical analysis and account of the development of the Comprehension Approach as a method for language learning The author draws on interrelated sub fields including linguistic theory child language acquisition and educational technology to examine how a comprehension based strategy could have pedagogical potential for adult second language learning While second language pedagogy has to date been dominated by production models this book takes another look at the Comprehension Approach as a possible alternative presenting results from both child first language and adult second language contexts It will be of interest to psycholinguistics and applied linguistics scholars particularly those with an interest in second language teaching and learning
