Making College Pay Beth Akers,2021-05-18 A leading economist makes the case that college is still a smart investment and reveals how to increase the odds of your degree paying off Full of easy to understand advice grounded in deep expertise and research Martin West William Henry Bloomberg Professor of Education Harvard University The cost of college makes for frightening headlines The outstanding balance of student loans is more than 1 5 trillion nationally while tuitions continue to rise And on the heels of a pandemic that nearly dismantled the traditional college experience we have to wonder Is college really worth it From a financial perspective says economist Beth Akers the answer is yes It s true that college is expensive but once we see higher education for what it is an investment in future opportunities job security and earnings a different picture emerges The average college graduate earns an additionalmillion dollars over their career compared to those who stopped their education after high school and on average two and four year schools deliver a 15 percent return on investment double that of the stock market Yet these outcomes are not guaranteed Rather they hinge upon where and how you opt to

invest your tuition dollars Simply put the real problem with college isn't the cost it's the risk that your investment might not pay off In *Making College Pay* Akers shows how to improve your odds by making smart choices about where to enroll what to study and how to pay for it You'll learn why choosing the right major can matter more than where you enroll the best criteria for picking a school hint not price selectivity or ranking why working part time while enrolled might set you back financially why it's often best to borrow even if you don't have to the pros and cons of innovative alternatives to traditional college how to take advantage of new low risk financing tools Full of practical advice for students and parents *Making College Pay* reminds us that higher education remains an engine for opportunity upward mobility and prosperity [Making College Work](#) Harry J. Holzer, Sandy Baum, 2017-08-15 Practical solutions for improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential while others earn degrees or certificates with little labor market value Large numbers of these students also struggle to pay for college and some incur debts that they have difficulty repaying The authors provide a new review of the causes of these problems and offer promising policy solutions The circumstances affecting disadvantaged students stem both from issues on the individual side such as weak academic preparation and financial pressures and from institutional failures Low income students disproportionately attend schools that are underfunded and have weak performance incentives contributing to unsatisfactory outcomes for many students Some solutions including better financial aid or academic supports target individual students Other solutions such as stronger linkages between coursework and the labor market and more structured paths through the curriculum are aimed at institutional reforms All students and particularly those from disadvantaged backgrounds also need better and varied pathways both to college and directly to the job market beginning in high school We can improve college outcomes but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process While no single policy is guaranteed to greatly improve college and career outcomes implementing a number of evidence based policies and programs together has the potential to improve these outcomes substantially **Mount Holyoke College** Mount Holyoke College, 1913 *Creating a College* Edmond Loris Volpe, 2000 *How to Run a College* Brian C. Mitchell, W. Joseph King, 2018-01-15 How can colleges stay relevant in the twenty first century Residential colleges are the foundation on which US higher education is based These institutions possess storied traditions fondly cherished by students alumni and faculty There is no denying however that all colleges today struggle with changing consumer preferences high sticker prices and aging infrastructure Technological and pedagogical alternatives not to mention growing political pressure present complex challenges What can colleges and smaller universities do to stay relevant in today's educational and economic climate In their concise guide *How to Run a College* Brian C Mitchell and W Joseph King analyze how colleges operate Widely experienced as trustees administrators and faculty they understand that colleges must update their practices monetize their assets and focus on core educational strategies in order to build

strong institutions Mitchell and King offer a frank yet optimistic vision for how colleges can change without losing their fundamental strengths To survive and become sustainable they must be centers of dynamic learning as well as economic engines able to power regional state and national economies Rejecting the notion that American colleges are holdovers from a bygone time How to Run a College shows instead that they are centers of experimentation and innovation that heavily influence higher education not only in the United States but also worldwide
