The ADA programming language was first used by the U S Department of Defense in the 1980s They wanted to develop a centralized and standardized computer programming language because there were thousands of languages in use most of which were designed for just one system ADA was officially standardized in 1979 and exclusively controlled by the Department of Defense but they released the language to the public in 1987 Today many industries use ADA which is now defined by an international programming standards called the language reference manual LRM ADA is a highly advanced programming language that is designed according to the fundamental software engineering principles of efficiency reliability portability and maintainability ADA provides everything from information hiding to abstract data types to concurrent oriented programming functionality Almost all professional ADA programmers follow a controlled validation process that eliminates poor practices and vulnerabilities that were possible through old languages like C Ada is a highly flexible and structured object oriented computer programming language There are many reasons why ADA is globally popular The syntax is very easy to learn so users can create basic code in just a few minutes Thus it is easy for users to follow the program semantics and the connections between ideas functions and language constructs The ADA programming language is so powerful that it is mainly limited by the creativity and competency of the programmer ADA has excellent error handling support for distributed systems and implementation of abstract data types and package encapsulation Programmers prefer ADA for different reasons First organizations will save on development costs because ADA does not require extended testing upgrades and quality assurance checks Instead it was designed with embedded checks so that users can quickly and effectively detect errors that would be caught during the debugging process with C based languages Second ADA is a mature well established language that has experienced different versions such as ADA 83 in the 1980s ADA 95 in the 1990s and ADA 2005 in recent years During every new release practical functionality and run time efficiency are the top priorities
