Basic Compounding And Processing Of Rubber:

Basic Compounding and Processing of Rubber Johnson, Harry Long, Allee, Dill, Sommer, 1985 **The Complete Book on Rubber Processing and Compounding Technology (with Machinery Details) 2nd Revised Edition** NIIR Board of Consultants and Engineers, 2010-02-05

The production of rubber and rubber products is a large and diverse industry. The rubber product manufacturing industry is basically divided into two major sectors: tyre and non tyre. The tyre sector produces all types of automotive and nonautomotive tyres, whereas the non tyre sector produces high technology and sophisticated products like conveyor belts, rubber seals, etc. The wide range of rubber products manufactured by the rubber industry comprises all types of heavy duty earth moving tyres, auto tyres, tubes, automobile parts, footwear, beltings, etc. The rubber industry has been growing tremendously over the years. The future of the rubber industry is tied to the global economy. Rapidly growing automotive sector in developing economies and increased demand for high performance tyres are expected to contribute to the growth of the global industrial rubber market. The current scenario reveals that there is a tremendous scope for the development of rubber processing industries. The global market for industrial rubber products is projected to increase 5.8% per year. Investment in rubber industry is expected to offer significant opportunities in the near future and realizing returns to investors willing to explore this sector. This book deals with all aspects of rubber processing: mixing, milling, extrusion, and molding; reclaiming and manufacturing process of rubber products. The major contents of the book are rubbers, materials, and processing; mixing technology of rubber; techniques of vulcanization; rubber vulcanization; rubber compounding; rubber reclaiming; manufacture of rubber products: latex and foam rubber, silicone rubber, polybutadiene and polyisoprene, styrene butadiene rubber, natural rubber, etc. The book contains addresses of plant machinery suppliers with their photographs. It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area, and others interested in the field of rubber processing technology.
