United States Armed Forces Institute Catalog ,1955 **Practical Stone Masonry** Peter Hill,John David,2014-02-04 Practical Stone Masonry is the first major book in nearly seventy years on the craft of the stonemason Today the work of the stonemason is almost exclusively confined to the repair of historic buildings requiring a full working knowledge of the detailed traditional craft practices relating to repairs This book addresses that need It covers the basic methods of working stone the making of specialized tools and for the first time a full analysis of the procedures for setting out for repairs A broad description of the nature and problems of stone also includes guidance on selection In addition the authors look at the causes of decay in stone and outline methods for repair of both stone and mortar Practical Stone Masonry contains essential advice for working masons and apprentices and all those engaged in planning and supervising such works It includes the basic methods of working stone how to make specialized tools the procedures for setting out for repairs explained and the nature and problems of stone plus a guide to selection *Sunset* ,1981 **Basic knowledge** John van Winden,1986 [Fabric of the Frontier](#) Rob Collins,Ian Kille,Kathleen O'Donnell,2023-07-06 What is Hadrian s Wall made of where did this material come from and how has it been reused in other buildings in the communities that emerged in the centuries after the Roman Empire By studying the fabric of Hadrian s Wall using a geological approach combined with archaeological methods is it possible to refine our answers to these questions This study describes how the relationship between the geology of the Wall s landscape and its fabric may be used to further understand the Wall and presents a significant set of new geological and archaeological data on the Wall s stones from across the length of the Wall This data set has been collected in two complementary ways First as a citizen science project where volunteers from local communities were trained to visually characterize sandstones and resulting in data collecting on large numbers of the Wall s stones along the length of the Wall Secondly analytical research was used to gather in scientific data for a selected sets of rocks and stones Geochemical data was captured using an X ray fluorescence spectrometer and petrographic observations made using a petrographic microscope and thin sections The combined methods provide a framework for geological analysis

of the Wall supported by robust data It builds on earlier work on Roman quarrying and stone preparation highlighting not only stone sources but the criteria for choosing stone stone preparation methods and the implied routes to the Wall At the heart of this study lies the ability to uniquely identify different sandstone types Geological methods used to achieve this are explored as are the ways in which the sandstones form This highlights both the possibilities and limits of this approach

service branches and the Department of Defense Updated every two years *Tracking Prehistoric Migrations* Jeffery J. Clark, 2001-02-01 This monograph takes a fresh look at migration in light of the recent resurgence of interest in this topic within archaeology The author develops a reliable approach for detecting and assessing the impact of migration based on conceptions of style in anthropology From numerous ethnoarchaeological and ethnohistoric case studies material culture attributes are isolated that tend to be associated only with the groups that produce them Clark uses this approach to evaluate Puebloan migration into the Tonto Basin of east central Arizona during the early Classic period A D 1200 1325 focusing on a community that had been developing with substantial Hohokam influence prior to this interval He identifies Puebloan enclaves in the indigenous settlements based on culturally specific differences in the organization of domestic space and in technological styles reflected in wall construction and utilitarian ceramic manufacture Puebloan migration was initially limited in scale resulting in the co residence of migrants and local groups within a single community Once this co residence settlement pattern is reconstructed relations between the two groups are examined and the short term and long term impacts of migration are assessed The early Classic period is associated with the appearance of the Salado horizon in the Tonto Basin The results of this research suggest that migration and co residence was common throughout the basins and valleys in the region defined by the Salado horizon although each local sequence relates a unique story The methodological and theoretical implications of Clark s work extend well beyond the Salado and the Southwest and apply to any situation in which the scale and impact of prehistoric migration are contested **Salvaged Treasures** Michael W.
