personal computer revolution fast approaching Kemeny and Kurtz began to lose control over BASIC as it achieved widespread popularity outside of Dartmouth The language was being adapted to run on a wide variety of computers some much too short of memory to contain the full set of Dartmouth BASIC features Most notably Microsoft built its business on the back of ROM based BASIC interpreters for a variety of microcomputers Although the language was ubiquitous in schools by the early 1980s it came under attack by such notables as computer scientist Edsger W Dijkstra for its lack of structure as well as by Kemeny and Kurtz themselves who viewed non Dartmouth Street BASIC as blasphemous and saw it as their mission to right the ship through language standardization and the release of True BASIC But by then it was too late the era of BASIC s global dominance was over In Endless Loop author Mark Jones Lorenzo documents the history and development of Dartmouth BASIC True BASIC Tiny BASIC Microsoft BASIC including Altair BASIC Applesoft BASIC Color BASIC Commodore BASIC TRS 80 Level II BASIC TI BASIC IBM BASICA GW BASIC QuickBASIC QBASIC Visual Basic and Small Basic as well as 9845 BASIC Atari BASIC BBC BASIC CBASIC Locomotive BASIC MacBASIC QB64 Simons BASIC Sinclair BASIC SuperBASIC and Turbo Basic PowerBASIC among a number of other implementations The ascendance of BASIC paralleled the emergence of the personal computer so the story of BASIC is first and foremost a story actually many interlocking stories about computers But it is also a tale of talented people who built a language out of a set of primal ingredients sweat creativity rivalry jealousy cooperation and plain hard work and then set the language loose in a world filled with unintended consequences How those unintended consequences played out leading to the demise of the most popular computer language the world has ever known is the focus of Endless Loop *An Introductory Guide to EC Competition Law and Practice* Valentine Korah,1994 BASIC Programming Today Steven L.
