Captured Alive:

The Non-verbal Type of Small Clauses in English and Lithuanian Judita Giparaite, 2009-12-14 The study The Non verbal Type of Small Clauses in English and Lithuanian is one of the first attempts to apply the methods of generative grammar to the analysis of a fragment of Lithuanian grammar i e constructions with secondary predicates of the type V NP1 NP2 and V NP1 AP the sub strings NP1 NP2 and NP1 AP of which in generative works are usually called small clauses The investigation is contrastive the evidence of Lithuanian is compared with that of English Whereas the syntactic study of secondary predicates in English has a certain tradition traditional Lithuanian grammar does not have a single notion to what is known elsewhere as secondary predicates In Lithuanian traditional grammar secondary predicates are usually referred to as a part of compound nominal predicates predicative attributes a part of complex objects and are not singled out as a distinct category but are given different often contradictory treatments Thus the research can be considered pioneering work as far as Lithuanian is concerned It not only contributes to the theoretical discussion about the adequate way of dealing with secondary predicates in Government and Binding framework but can also be considered instrumental in propagating modern methods of syntactic analysis in tradition ridden Lithuanian grammar The present work addresses an important problem whether the Lithuanian and English constructions under investigation express a subject predicate relationship and form a constituent and can be described as having the syntactic function of a clause For this purpose the syntactic and semantic as well as clausal properties of the sequences NP1 NP2 and NP1 AP in the two languages under consideration are discussed The clausal properties of the sub strings NP1 NP2 and NP1 AP are investigated on the basis of the presence of agreement features sentence negation the resemblance to full clauses theta role assignment word order and applying sentence constituency tests Investigations in Fish Control ,1976 *Warfare in Japan* Harald Kleinschmidt, 2017-05-15 Warfare in Japan from the fourth to the nineteenth century has caused much controversy among Western military and political historians This volume assembles key articles written by specialists in the field on military organization the social context of war battle action weapons and martial arts The focus is on the transformation of patterns of warfare that arose from endogenous as well as exogenous factors **The Naturalist** ,1886 The Auk ,1900 This journal disseminates original scientific research on bird species and broad biological concepts such as ecology evolution behavior physiology genetics Topics include documentation analysis and interpretation of laboratory and field studies theoretical and methodological developments and reviews of information and ideas *Improving Recovery and Full Accounting of POW/MIA Personnel from All Past Conflicts* United States.
