**Critical Threshold** Brian Stableford, 2017-08-07 They call them the rat catchers They re the crew of the spaceship Daedalus which an economically destitute Earth has dispatched on a mission to re establish contact with its far flung long lost colonies in space Alex Alexander the ship s biologist together with his staff must help solve the mysteries of human and alien ecosystems that he encounters light years from home Dendra is a stable world covered by a huge unchanging forest except that nothing living can really be free of change The planet has no seasons but its animal life still undergoes life cycles involving birth maturation metamorphosis and death The Earth colony sent to tame the world has failed at least in the terms expected of it and seems beyond redemption but the crew of the Daedalus still has to find out exactly why and how the program has gone wrong Provided of course that they can survive the investigation itself

*Nature and the Numinous in Mythopoeic Fantasy Literature* Chris Brawley, 2014-06-26 This book makes connections between mythopoeic fantasy works that engage the numinous and the critical apparatuses of ecocriticism and posthumanism Drawing from the ideas of Rudolf Otto in *The Idea of the Holy* mythopoeic fantasy is a means of subverting normative modes of perception to both encounter the numinous and to challenge the perceptions of the natural world Beginning with S T Coleridge s theories of the imagination as embodied in *The Rime of the Ancient Mariner* the book moves on to explore standard mythopoeic fantasists such as George MacDonald C S Lewis and J R R Tolkien Taking a step outside these men particularly influenced by Christianity the concluding chapters discuss Algernon Blackwood and Ursula Le Guin whose works evoke the numinous without a specifically Christian worldview

**Wittgenstein among the Sciences** Rupert Read, Edited by Simon Summers, 2016-02-17 Engaging with the question of the extent to which the so called human economic or social sciences are actually sciences this book moves away from the search for a criterion or definition that will allow us to sharply distinguish the scientific from the non scientific Instead the book favours the pursuit of clarity with regard to the various enterprises undertaken by human beings with a view to dissolving the felt need for such a demarcation In other words Read pursues a therapeutic approach to the issue of the status and nature of these subjects Discussing the work of Kuhn Winch and Wittgenstein in relation to fundamental question of methodology Wittgenstein among the Sciences undertakes an examination of the nature of natural science itself in the light of which a series of successive cases of putatively scientific disciplines are analysed A novel and significant contribution to social science methodology and the philosophy of science and the human sciences this book will be of interest to social scientists and philosophers as well as to psychiatrists economists and cognitive scientists
