Alienation And Identification:

Alienation and Identification Morton A. Kaplan, 1976

Alienation and Identification Austin J. McGrath, 2021

Consider your love for something you believe valuable perhaps a friend or your child Contrast this love with the kind of hate that drug addicts typically have toward their addiction Some philosophers would call your desire for your friend s or child s wellbeing an identified with attitude and the addict s desire for their drug an alien attitude Many use identification and alienation as standards for among other things moral responsibility and autonomy arguing that identifying with an attitude that leads one to act is sufficient or necessary for moral responsibility for and autonomy in that act whereas being alienated from the attitude that leads to action is sufficient or necessary for not being morally responsible for nor autonomous in the act Even non philosophers seem to use alienation and identification often we use them as standards for living our best lives our best lives fit with what we really believe and want that is attitudes we identify with The problem is extant and natural theories of alienation and identification are almost universally recognized as deeply problematic I argue for new theories of both alienation and identification that I also argue solve these problems The first chapter starts with the idea that the concepts of alienation and identification mutually exclude each other If an attitude is alien we cannot think it is identified with and if an attitude is identified with we cannot think it is alien I ask the question which relation between alienation and identification most plausibly secures their mutual exclusivity Beside the answer being interesting it will ensure that our theories of alienation and identification do not allow for the impossible alien identified with attitude and it may help us develop a theory of one from the other for example if alienation were merely not identifying with an attitude then once we have a theory of identification we immediately have one of alienation The relation that I argue most plausibly secures their mutual exclusivity is a certain kind of opposition which allows for neutral attitudes attitudes that we neither identify with nor are alienated from The next chapter begins by explaining certain deep apparently intractable problems for extant and natural theories of alienation Very roughly the main problems are that none of the views can handle cases in which we manipulate you into alienation they all imply that alienation can be the result of manipulation nor can they provide a principled reason why the attitudes they point to as those constituting our alienation are of the right kind are special enough to ground our alienation for example a rejection of another attitude doesn t seem to have any particularly special features allowing it to constitute our alienation with another attitude The view I argue for that I also argue solves these problems is roughly an attitude is alien just when and because the relevant negative attitude toward it makes sense in light of all of our attitudes collectively The rough argument for this view is that an attitude is alien just when and because our rejection of it reflects our view and this happens just when and because the rejection makes sense to us The thesis of the next chapter naturally follows if the first two are right an attitude is identified with just and because the relevant pro attitude toward it makes sense in light of our attitudes collectively For example when your say endorsement of your desire for your friend or child s wellbeing makes

sense in light of your other attitudes collectively when your full actual self rationalizes the endorsement then and only then is your desire identified with Not surprisingly I argue for this view in roughly the same way I argue for the alienation view of the previous paper

Alienation Vs. Identification Souran Mardini,2015

Alienation and Identity in Romantic Love Gary Foster,2024-08-06 The concept of romantic love influenced as it is by the theme within Romanticism of alienation and identification suggests an important connection between love and personal identity Love in this context recognizes both the sense in which one s beloved is a separate human being and is at the same time a constitutive aspect of one s identity Alienation and Identity in Romantic Love explores this connection in the context of discussions of both metaphysical views of personal identity and practical or ethical accounts To this end Gary Foster discusses the work of influential philosophers in both the analytic and continental traditions as well as the findings of sociologists He explores the love and personal identity relationship through moral and narrative perspectives and examines certain aspects of the modern love experience such as the phenomenon of online dating Ultimately Foster finds in Jean Paul Sartre s work a promising approach to understanding this connection through his emphasis on embodied identity

Handbook of Income Distribution Anthony B. Atkinson,Francois Bourguignon,2014-12-30 What new theories evidence explanations and policies have shaped our studies of income distribution in the 21st century Editors Tony Atkinson and Francois Bourguignon assemble the expertise of leading authorities in this survey of substantive issues In two volumes they address subjects that were not covered in Volume 1 2000 such as education health and experimental economics and subjects that were covered but where there have been substantial new developments such as the historical study of income inequality and globalization Some chapters discuss future growth areas such as inheritance the links between inequality and macro economics and finance and the distributional implications of climate change They also update empirical advances and major changes in the policy environment The volumes define and organize key areas of income distribution studies Contributors focus on identifying newly developing questions and opportunities for future research The authoritative articles emphasize the ways that income mobility and inequality studies have recently gained greater political significance

The Measurement of Individual Well-Being and Group Inequalities Joseph Deutsch,Jacques Silber,2013-07-31 Although most traditional economic theory puts the individual at the centre of analysis more recent approaches have acknowledged the importance of a wider sense of identity as a determinant of individual behaviour Whether it is ethnicity religion or gender group membership is a central part of human life This book presents new advances in areas which consider both the individual and the group when measuring inequalities and well being The first part of the book covers topics such as relative deprivation and happiness domains where even economists have now recognized the importance of reference groups in the assessment of individuals well being The second part is devoted to the concept of polarization a growing field of inquiry among economists The third part looks at income and wage intra generational mobility while the fourth part reports on recent advances in measuring the significant differences between

and within groups The book concludes with several chapters devoted to poverty and social exclusion stressing in particular the need for a multidimensional approach to these topics This collection offers a fresh look at the way individual well being should be measured by emphasizing the role of reference groups and the idea of polarization as well as stressing the impact on well being of changes over time to the relative position of individuals This book should be of interest to graduate students and researchers working in the field of development economics inequality and poverty *Subjectivity and Otherness*

Lorenzo Chiesa,2007-09-28 The evolution of the concept of subjectivity in the works of Jacques Lacan Countering the call by some pro Lacanians for an end to the exegesis of Lacan s work and the dismissal by anti Lacanians of Lacan as impossibly impenetrable *Subjectivity and Otherness* argues for Lacan as a paradoxically systematic thinker and for the necessity of a close analysis of his texts Lorenzo Chiesa examines from a philosophical perspective the evolution of the concept of subjectivity in Lacan s work carrying out a detailed reading of the Lacanian subject in its necessary relation to otherness according to Lacan s orders of the Imaginary the Symbolic and the Real Chiesa emphasizes the continuity underlying apparently incompatible phases of Lacan s examination of the subject describing Lacan s theory as a consistent philosophical system but one that is constantly revised and therefore problematic Chiesa analyzes each old theory of the subject within the framework of a new elaboration and reassesses its fundamental tenets from the perspective of a general psychoanalytic discourse that becomes increasingly complex From the 1960s on writes Chiesa the Lacanian subject amounts to an irreducible lack that must be actively confronted and assumed this subjectivized lack Chiesa argues further offers an escape from the contemporary impasse between the death of the subject alleged by postmodernism and a return to a traditional substantialist notion of the subject An original treatment of psychoanalytic issues *Subjectivity and Otherness* fills a significant gap in the existing literature on Lacan taking seriously the need for a philosophical investigation of Lacanian concepts [The History and Theory of Rhetoric](#) James A. Herrick,2020-12-29

By tracing the traditional progression of rhetoric from the Greek Sophists to contemporary theorists this textbook gives students a conceptual framework for evaluating and practicing persuasive writing and speaking in a wide range of settings and in both written and visual media The book s expansive historical purview illustrates how persuasive public discourse performs essential social functions and shapes our daily worlds drawing on the ideas of some of history s greatest thinkers and theorists The seventh edition includes greater attention to non Western rhetorics feminist rhetorics the rhetoric of science and European and American critical theory Known for its clear writing style and contemporary examples throughout *The History and Theory of Rhetoric* emphasizes the relevance of rhetoric to today s students This revised edition serves as a core textbook for rhetoric courses in both English and communication programs covering both the historical tradition of rhetoric and contemporary rhetoric studies This edition includes an instructor s manual and practice quizzes for students at www.routledge.com/cw/herrick

Kaplan, 1998 **A Social History of Iranian Cinema, Volume 1** Hamid Naficy, 2011-09-16 Social history of Iranian cinema that explores cinema's role in creating national identity and contextualizes Iranian cinema within an international arena The first volume focuses on silent era cinema and the transition to sound The Palgrave Handbook of Economics and Language Shlomo Weber, Victor Ginsburgh, 2026-02-07 This revised and updated handbook brings together methodological theoretical and empirical studies in the economics of language With contributions from leading researchers it examines the impact of linguistic diversity on economic outcomes and public policies The interdependence of language and culture is highlighted through an analysis of the evolution of different languages and the economic consequences of linguistic diversity as well as the impact of language on consumer behavior and the creation of gendered economic structures Particularly attention is given to the impact of languages on macroeconomics including the relationship between language and trade and language and migrations The challenge of globalization to minority languages and the growth of multilingual societies is also discussed alongside the specific dynamics between economics and language at a regional level It also addresses new developments in LLM large language models This book offers a detailed and original look at the role language plays within international and local economic systems It will be of interest to students and researchers interested in the economics of language **Reports of Cases Determined in the Supreme Court of the State of California** California. Supreme Court, 1898 Character and Identity: Philosophical foundations of political and sociological perspectives Morton A. Kaplan, 1998 Character and Identity Philosophical Foundations of Political and Sociological Perspectives is designed by editor Morton A Kaplan to show despite the fundamental flaws in the classical Greek accounts of truth and knowledge why its quest for rational knowledge remains legitimate and vital to the concepts of character and identity To set the stage Part One includes a statement of the classical Greek position by Dean Jude Dougherty an account of the contemporary anticlassical stories position by John Simpson and an initial attempt to restore the Greek concept of rational inquiry by Lloyd Eby In subsequent chapters Kaplan restates the Greek position and shows why developments in science and philosophy are incompatible with the Greek concepts of truth and knowledge A brief excursus through the history of philosophy is intended to show how the Greek quest can be pursued in a manner consonant with the contemporary realm of knowledge In the course of this argument it will be shown why Leo Strauss who regarded contemporary philosophy as the prisoner of a mistaken seventeenth century paradigm fatally misconceived the role of seventeenth century philosophy and its relationship to contemporary thought Kaplan argues that contemporary philosophy is in large part a response to the breakdown of Hegel a great attempt to provide a modern alternative to Aristotle's synoptic philosophy an attempt that brings history and historicity into the center of the picture Kaplan shows why postmodernism is based on an incomplete and ultimately incoherent understanding of the consequences of the collapse of the Hegelian system and of the character of language In a version of pragmatism that restores the concept of objective truth Kaplan then explores the political and sociological aspects

of this philosophical position and shows how it relates to character and identity He then shows how a weakly ordered but relevant position with respect to ethics and morals is consistent with a sustainable contemporary understanding of the quest for rational objective knowledge
