Dynamic Defense:

Dynamic Neural Networks for Robot Systems: Data-Driven and Model-Based Applications Long Jin, Predrag S. Stanimirovic, Sendren Sheng-Dong Xu, 2024-07-24 Neural network control has been a research hotspot in academic fields due to the strong ability of computation. One of its widely applied fields is robotics. In recent years, plenty of researchers have devised different types of dynamic neural network (DNN) to address complex control issues in robotics fields in reality. Redundant manipulators are no doubt indispensable devices in industrial production. There are various works on the redundancy resolution of redundant manipulators in performing a given task with the manipulator model information known. However, it becomes knotty for researchers to precisely control redundant manipulators with unknown model to complete a cyclic motion generation (CMG) task to some extent. It is worthwhile to investigate the data-driven scheme and the corresponding novel dynamic neural network (DNN) which exploits learning and control simultaneously. Therefore, it is of great significance to further research the special control features and solve challenging issues to improve control performance from several perspectives such as accuracy, robustness, and solving speed.

The Changing Military Balance in the Koreas and Northeast Asia Anthony H. Cordesman, Aaron Lin, 2015-07-07 The tensions between the Koreas and the potential involvement of China, Japan, Russia, and the United States in a Korean conflict create a nearly open-ended spectrum of possible conflicts. These conflicts could range from posturing and threats to a major conventional conflict on the Korean peninsula with intervention by outside powers to the extreme of nuclear conflict. The Korean balance is also affected by the uncertain mix of cooperation and competition between the United States and China, particularly with the U.S. pivot toward Asia and the steady modernization of Chinese forces. This new volume, up to date through Spring 2015, provides a detailed examination of the military forces in Northeast Asia: North and South Korea, China, Russia, Japan, and the United States, setting those forces in the larger geostrategic context.

Artificial Intelligence and Security Xingming Sun, Xiaorui Zhang, Zhihua Xia, Elisa Bertino, 2022-07-04 This three-volume set (LNCS 13338-13340) constitutes the thoroughly refereed proceedings of the 8th International Conference on Artificial Intelligence and Security (ICAIS 2022) which was held in Qinghai, China, in July 2022. The total of 166 papers included in the 3 volumes were carefully reviewed and selected from 1124 submissions. The papers present research, development, and applications in the fields of artificial intelligence and information security.

Cyberwarfare: Information Operations in a Connected World Mike Chapple, David Seidl, 2021-10-11 Cyberwarfare: Information Operations in a Connected World puts students on the real-world battlefield of cyberspace. It reviews the role that cyberwarfare plays in modern military operations, operations in which it has become almost impossible to separate cyberwarfare from traditional warfare.

The Evolving Military Balance in the Korean Peninsula and Northeast Asia Anthony H. Cordesman, Ashley Hess, 2013-07-10 The Evolving Military Balance in the Korean Peninsula and Northeast Asia describes the strategy, force deployments, and the military balance in potential current and future scenarios involving the

Democratic People's Republic of Korea Republic of Korea People's Republic of China Japan and the United States The analysis in these volumes shows how tensions between the Koreans and the potential involvement of the China Japan Russia and the United States create a nearly open ended spectrum of possible conflicts These range from posturing and threats wars of intimidation to a major conventional conflict on the Korean Peninsula to intervention by outside powers like the United States and China to the extreme of nuclear conflict The analysis shows that the Korean balance is sharply affected by the uncertain mix of cooperation and competition between the United States and China The U S rebalancing of its forces to Asia and the steady modernization of Chinese forces in particular the growth of Chinese sea air missile capabilities affect the balance in the Koreas and Northeast Asia They also raise the possibility of far more intense conflicts that could extend far beyond the boundaries of the Koreas

Machine Learning for Cyber Security Xiaofeng Chen,Xinyi Huang,Jun Zhang,2019-09-11 This book constitutes the proceedings of the Second International Conference on Machine Learning for Cyber Security ML4CS 2019 held in Xi an China in September 2019 The 23 revised full papers and 3 short papers presented were carefully reviewed and selected from 70 submissions The papers detail all aspects of machine learning in network infrastructure security in network security detections and in application software security
