 BUNGE,1977-06-30 In this Introduction we shall sketch the business of ontology or metaphysics and shall locate it on the
 map of learning This has to be done because there are many ways of construing the word ontology and because of the bad
 reputation metaphysics has suffered until recently a well deserved one in most cases 1 ONTOLOGICAL PROBLEMS
 Ontological or metaphysical views are answers to ontological ques tions And ontological or metaphysical questions are
 questions with an extremely wide scope such as Is the world material or ideal or perhaps neutral Is there radical novelty and
 if so how does it come about Is there objective chance or just an appearance of such due to human ignorance How is the
 mental related to the physical Is a community anything but the set of its members and Are there laws of history Just as
 religion was born from helplessness ideology from conflict and technology from the need to master the environment so
 metaphysics just like theoretical science was probably begotten by the awe and bewilderment at the boundless variety and
 apparent chaos of the phenomenal world i e the sum total of human experience Like the scientist the metaphysician looked
 and looks for unity in diversity for pattern in disorder for structure in the amorphous heap of phenomena and in some cases
 even for some sense direction or finality in reality as a whole *The Encyclopaedia Britannica* ,1888 **The Medical**
