Computer Vision - ECCV 2008 David Forsyth, Philip Torr, Andrew Zisserman, 2008-10-13 Welcome to the 2008 European Conference on Computer Vision These proceedings are the result of a great deal of hard work by many people To produce them a total of 871 papers were reviewed Forty were selected for oral presentation and 203 were selected for poster presentation yielding acceptance rates of 4.6% for oral 23.3% for poster and 27.9% in total We applied three principles First since we had a strong group of Area Chairs the final decisions to accept or reject a paper rested with the Area Chair who would be informed by reviews and could act only in consensus with another Area Chair Second we felt that authors were entitled to a summary that explained how the Area Chair reached a decision for a paper Third we were very careful to avoid conflicts of interest Each paper was assigned to an Area Chair by the Program Chairs and each Area Chair received a pool of about 25 papers The Area Chairs then identified and ranked appropriate reviewers for each paper in their pool and a constrained optimization allocated three reviewers to each paper We are very proud that every paper received at least three reviews At this point authors were able to respond to reviews The Area Chairs then needed to reach a decision We used a series of procedures to ensure careful review and to avoid conflicts of interest Program Chairs did not submit papers The Area Chairs were divided into three groups so that no Area Chair in the group was in conflict with any paper assigned to any Area Chair in the group

The Challenge of Developing Statistical Literacy, Reasoning and Thinking Dani Ben-Zvi, Joan Garfield, 2006-02-23 Research in statistics education is an emerging field with much of the work being published in diverse
