Dioxins And Health

Arnold J. Schechter

Dioxins And Health:

Dioxins and Health A. Schechter, 1994-12-31 This book originated in a series of cross disciplinary conversations in the years 1984 1990 between the editor who is a physician researcher involved in clinical and laboratory research and a dioxin toxicologist During the years in which the conversations took place an extraordinary amount of new scientific literature was published related to dioxins defined for purposes of this text as the chlorinated dibenzo p dioxins dibenzofurans polychlorinated biphenyls PCB s and other compounds that are structurally and toxicologically similar to 2 3 7 8 tetrachlorodibenzo p dioxin 2 3 7 8 TCDD the most extensively studied and most toxic of this group of chemicals Dioxins also began to interest not only chemists and toxicologists but also specialists from diverse disciplines such as wildlife and environmental science immunology neuroscience public health epidemiology medicine government law sociology and journalism Specialists from such varied disciplines while familiar with their own literature frequently did not have time to follow the dioxin literature outside their specialty area In addition each specialty had unique knowledge methods and perspectives Cross disciplinary conversation was necessary but all too frequently specialists from the various disciplines did not speak the same language resulting in misunderstanding

Dioxins in the Environment Michael A. Kamrin,Paul W. Rodgers,1985 [Seeing Nature Through Gender](#) Virginia Scharff,2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women s actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd s masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has

reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred
betties Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and
water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing
Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural
world can remake the gendered patterns we ve engraved on ourselves and on the planet **Toxicological Profile for
