## **Disability Discourse:**

**Disability Discourse** Corker, Mairian, French, Sally, 1999-02-01 Why has the discursive turn been sidelined in the development of a social theory of disability and what has been the result of this How might a social theory of disability which fully incorporates the multidimensional and multifunctional role of language be described What would such a theory contribute to a more inclusive understanding of discourse and culture The idea that disability is socially created has in recent years been increasingly legitimated within social cultural and policy frameworks and structures which view disability as a form of social oppression However the materialist emphasis of these frameworks and structures has sidelined the growing recognition of the central role of language in social phenomena which has accompanied the linguistic turn in social theory As a result little attention has been paid within Disability Studies to analysing the role of language in struggle and transformation in power relations and the engineering of social and cultural change Drawing upon personal narratives rhetoric material discourse discourse analysis cultural representation ethnography and contextual studies international contributors seek to emphasize the multi dimensional and multi functional nature of disability language in an attempt to further inform our understanding of disability and to locate disability more firmly within contemporary mainstream social and cultural theory

*Disability and Discourse Analysis* Jan Grue, 2016-05-23 Disability studies has engaged with discourse analysis in key works both from the UK and the USA While the perspectives and analyses of discourse analysis have proved well suited for exploring disability however its methods have not been sufficiently developed in a disability studies context Conversely discourse analysts have traditionally been concerned with social issues and fields in which asymmetric power relations marginalization and discrimination play a central role e g gender race ethnicity and sexual orientation all of which share many analytical features with disability But although efforts have been made to integrate disability into the discourse analysis and conversation analysis canon the link between the two fields needs to be strengthened This ground breaking volume contributes to this link by thoroughly applying the analytical vocabulary of discourse analysis to issues that are central to the field of disability studies It strengthens disability studies by supplying case studies of representations and constructions of disability and disabled people in discourse theorizes the role played by language in the social construction of disability and makes disability a more salient topic for discourse analysts

**Disability Discourse** Mairian Corker, Sally French, 1999 Disability Discourse seeks to emphasize the multi dimensional multi functional nature of disability language in an attempt to further inform our understanding of disability

*Dangerous Discourses of Disability, Subjectivity and Sexuality* Margrit Shildrick, 2009-08-28 This book examines disability in the context of two areas subjectivity and sexuality in which it has been hitherto suppressed Using feminist and postmodernist analysis Margrit Shildrick explores what motivates the discrimination devaluation and alienation directed at disabled people and argues that the difference that disability encapsulates uncovers a psycho cultural imaginary that

sustains modernist understandings of what constitutes an embodied subject Where autonomy is the most valued attribute of subjectivity any compromise of bodily control indication of connectivity or of corporeal instability mobilizes a deep seated anxiety in the normative majority that is most acute in relation to disability and sexuality By critiquing conventional paradigms this study shows how it becomes possible to celebrate the fluidity unpredictability and connectivity already associated with disability and creatively queer understanding of the embodied self Using an analysis that draws on critical cultural theory emergent strands in critical disability studies postconventional philosophy and feminist theories of the body from Merleau Ponty to Haraway and Deleuze and social policy and legal discourse Shildrick argues for the need to contextualise disability as a matter of ethical import

**BOOK JACKET**      **Disability, Discourse and Technology** Najma Al Zidjaly,2014-01-14 Exclusion is the main predicament faced by people with disabilities across contexts and cultures yet it is one of the least academically studied concepts This book offers an applied linguistics perspective on critical and timely issues in disability research filling in a number of gaps in discourse analysis and disability studies      **Journal of Disability Policy Studies** ,2007      **Disability, Human Rights and Education** Felicity Armstrong,Len Barton,1999 This volume recognizes the importance of an informed cross cultural understanding of the policies and practices of different societies within the field of disability human rights and education It represents an attempt to critically engage with issues arising from the historical and contemporary domination of portrayals of the western as advanced democratic and exemplary in contrast to the construction of the rest of the world as backward primitive and inferior in thses fundamental areas How human rights are understood in different contexts is a key theme in this book Some contributors raise questions about the value of a human rights model across all societies Others see the struggle for human rights as at the heart of the struggle for an inclusive society The implications for education arising from this debate are identified and a series of questions are raised by each author for further reflection and discussion as well as providing a stimulus for developing future research      *(Dis)labeled* Lauren Jeanneau,2015      *Disability, Discourse and Technology* Najma Al Zidjaly,2015-08-27 Exclusion is the main predicament faced by people with disabilities across contexts and cultures yet it is one of the least academically studied concepts This book offers an applied linguistics perspective on critical and timely issues in disability research filling in a number of gaps in discourse analysis and disability studies      **Disability in Different Cultures** Brigitte Holzer,Arthur Vreede,Gabriele Weigt,1999 How are disability and rehabilitation conceived of in different cultures How can these concepts be made accessible Studies from the fields of sociology ethnology and educational science address these questions while contributors from rehabilitation projects in development cooperation and from self help movements highlight culturally different perceptions of disability A distinctive feature of this volume is the dialogue it creates by bringing together scientific praxis and practical work This book is a collection of virtually all the contributions presented and discussed at the symposium Local Concepts and Beliefs about Disability in Different Cultures Here people with disabilities from both North and South

met with special education professionals people working in development cooperation organizations and students and academics from different disciplines concerned with disability and started a dialogue which is reflected in this volume This dialogue which was initiated at the symposium should serve to continue in greater depth on the basis of this anthology The reader has the further aim of carrying the dialogue beyond the restricted circle of symposium participants and making it accessible and comprehensible to a wider public Disability in Different Cultures is an essential issue in development cooperation On the one hand disabilities whether physical mental or emotional can be seen as parameters for the structural disadvantaging and deficits of the countries with so called catching up development They are very frequently the results of hunger malnutrition and wars Thus NGOs are confronted with the issue of disability regardless of the social and economic areas with which they are concerned Another reason for addressing the issue of Disability in Different Cultures is that it is wide reaching even if it is evident at first glance and relates to the emancipatory potential of the topic In exploring the wide variety of local concepts of and different ideas and beliefs about disability it becomes strikingly clear just how differently a disability may be judged In this light disability can no longer be perceived as a physical psychological or mental characteristic that a person is born with or has acquired in the course of her or his life It becomes evident that to a large degree attitudes and interaction with others which are usual in the respective social context form and influence the nature and extent of a disability thereby determining the life of the disabled person *Disability Studies Quarterly*, 1999

*Reading and Writing Disability Differently* Tanya Titchkosky, 2007 Mixing rigorous social theory with concrete analysis Reading and Writing Disability Differently unpacks the marginality of disabled people by addressing how the meaning of our bodily existence is configured in everyday literate society Tanya Titchkosky begins by illustrating how news media and policy texts reveal dominant Western ways of constituting the meaning of people and the meaning of problems as they relate to our understandings of the embodied self Her goal is to configure disability as something more than a problem and beyond simply a positive or a negative and to treat texts on disability as potential sites to examine neo liberal culture Titchkosky holds that through an exploration of the potential behind limited representations of disability we can relate to disability as a meaningful form of resistance to the restricted normative order of contemporary embodiment Incorporating a textual analysis of ordinary depictions of disability this innovative study promises to represent embodied differences in new ways and alter our imaginative relations to the politics of the body **Disability/postmodernity** Mairian Corker, Tom Shakespeare, 2002 This text looks at the study of disability within the context of the postmodern world of the 21st century The authors aim to demystify the concept of postmodernity and to suggest ways in which it fosters a holistic approach to the study of disability

**Narrative Prosthesis** David T. Mitchell, Sharon L. Snyder, 2014-05-21 Narrative Prosthesis Disability and the Dependencies of Discourse develops a narrative theory of the pervasive use of disability as a device of characterization in literature and film It argues that while other marginalized identities have suffered cultural exclusion due to a dearth of

images reflecting their experience the marginality of disabled people has occurred in the midst of the perpetual circulation of images of disability in print and visual media The manuscript s six chapters offer comparative readings of key texts in the history of disability representation including the tin soldier and lame Oedipus Montaigne s infinities of forms and Nietzsche s higher men the performance history of Shakespeare s Richard III Melville s Captain Ahab the small town grotesques of Sherwood Anderson s Winesburg Ohio and Katherine Dunn s self induced freaks in Geek Love David T Mitchell is Associate Professor of Literature and Cultural Studies Northern Michigan University Sharon L Snyder is Assistant Professor of Film and Literature Northern Michigan University
