Written by leading international scholars from the main contributing perspectives and disciplines, *The Routledge International Handbook on Narrative and Life History* seeks to capture the range and scope as well as the considerable complexity of the field of narrative study and life history work by situating these fields of study within the historical and contemporary context. Topics covered include: The historical emergences of life history and narrative study; Techniques for conducting life history and narrative study; Identity and politics; Generational history; Social and psycho social approaches to narrative history. With chapters from expert contributors, this volume will prove a comprehensive and authoritative resource to students, researchers, and educators interested in narrative theory, analysis, and interpretation.

Advances in Biographical Methods Maggie O'Neill, Brian Roberts, Andrew Sparkes, 2014-12-05 Rooted in a long and diverse genealogy, biographical approaches have developed from a focus upon a single story, a life story, and personal documents (e.g. diaries) to encompass more routinely autobiographical, secondary, and archival research and analysis, as well as multi-media, arts-based, creative, multi-sensory methods. *Biographical Research and Practices* as part of human understanding helps people to make sense of what has been and what is happening in their lives, cultures, communities, and societies. *Advances in Biographical Methods: Creative Applications* takes up these themes, theorising, doing, and applying current advances in biographical methods. It demonstrates the momentum with which they are developing as a field of scholarship, especially in relation to creative innovations and applications such as in new forms of interview and other practices, and debates on its interlinking with art performance and digital methods.
