### **Synthesis of Biomass Utilization for Bioenergy Production in the Western United States** David L.

Nicholls,2010-06 Examines the use of woody residues primarily from forest harvesting or wood products manufacturing operations and from urban wood wastes as a feedstock for direct combustion bioenergy systems for electrical or thermal power applications Examines opportunities for utilizing biomass for energy at several different scales with an emphasis on larger scale electrical power generation at stand alone facilities and on smaller scale facilities thermal heating only such as gov t educ or other institutional facilities Identifies west wide barriers that tend to inhibit bioenergy applications incl terrain accessibility harvesting and capital costs Evaluates the role of gov t as a catalyst in stimulating new technol and new uses of biomass material Illus A Synthesis of Biomass Utilization for Bioenergy Production in the Western United States David L.

Nicholls,2008 We examine the use of woody residues primarily from forest harvesting or wood products manufacturing operations and to a limited degree from urban wood wastes as a feedstock for direct combustion bioenergy systems for electrical or thermal power applications We examine opportunities for utilizing biomass for energy at several different scales with an emphasis on larger scale electrical power generation at stand alone facilities and on smaller scale facilities thermal heating only such as governmental educational or other institutional facilities We then identify west wide barriers that tend to inhibit bioenergy applications including accessibility terrain harvesting costs and capital costs Finally we evaluate the role of government as a catalyst in stimulating new technologies and new uses of biomass material *State Woody Biomass Utilization Policies* Dennis R.
