**Ancient Greek Architects at Work** J. J. Coulton, 1982 Taking an unusual approach to his subject J J Coulton examines ancient Greek architecture from the point of view of the practicing architects He discusses their ideas and technical achievements from the early seventh century B C to the first century B C Drawing on surviving written evidence from antiquity as well as on the evidence of the buildings themselves Mr Coulton provides answers to such questions as What must it have been like to build a Greek temple Who did the building What training was required How did the Greeks begin What problems did they face The first chapter considers the relations of architects to patrons and clients and the role of architects in ancient society generally Subsequent chapters explore a series of architectural problems and their solutions In his final chapter Mr Coulton assesses the architects techniques and their contributions to structural design evaluating their theoretical knowledge of mechanics and their practical understanding of structural concepts Generously illustrated and lucidly written this volume will appeal to all who are interested in architecture architectural history and archaeology

**Oxford Handbook of Ancient Greek Religion** Esther Eidinow, Julia Kindt, 2015-10-01 This handbook offers both students and teachers of ancient Greek religion a comprehensive overview of the current state of scholarship in the subject from the Archaic to the Hellenistic periods It not only presents key information but also explores the ways in which such information is gathered and the different approaches that have shaped the area In doing so the volume provides a crucial research and orientation tool for students of the ancient world and also makes a vital contribution to the key debates surrounding the conceptualization of ancient Greek religion The handbook s initial chapters lay out the key dimensions of ancient Greek religion approaches to evidence and the representations of myths The following chapters discuss the continuities and differences between religious practices in different cultures including Egypt the Near East the Black Sea and Bactria and India The range of contributions emphasizes the diversity of relationships between mortals and the supernatural in all their manifestations across between and beyond ancient Greek cultures and draws attention to religious activities as dynamic

highlighting how they changed over time place and context Nemrud Dagi Herman Brijder,2014-08-25 This richly illustrated book presents in detail the sanctuaries built during the reign of Antiochus I of Commagene ca 75 36 BCE including the three large tombs and ten cult places and discusses Antiochus rule in the context of his religious program and cult of the divine ruler This book is the final publication of the results of the International Nemrud Dagi Project 2001 2003 **The Architectural Model** Matthew Mindrup,2019-10-08 An investigation of different uses for the architectural model through history as sign souvenir funerary object didactic tool medium for design and architect s muse For more than five hundred years architects have employed three dimensional models as tools to test refine and illustrate their ideas But as Matthew Mindrup shows the uses of physical architectural models extend beyond mere representation An architectural model can also simulate instruct inspire and generate architectural designs It can be among other things sign souvenir toy funerary object didactic tool medium or muse In this book Mindrup surveys the history of architectural models by investigating their uses both theoretical and practical Tracing the architectural model s development from antiquity to the present Mindrup also offers an interpretive framework for understanding each of its applications in the context of time and place He first examines models meant to portray extant fantastic or proposed structures describing their use in ancient funerary or dedicatory practices in which models are endowed with magical power as a medium for architectural reverie and inspiration and as prototypes for twentieth century experimental designs Mindrup then considers models that exemplify certain architectural uses exploring the influence of Leon Battista Alberti s dictum that models be simple lest they distract from the architect s ideas analyzing the model as a generative tool and investigating allegorical analogical and anagogical interpretations of models Mindrup s histories show how the model can be a surrogate for the architectural structure itself or for the experience of its formal tactile and sensory complexity and beyond that that the manipulation play experimentation and dreaming enabled by models allow us to imagine architecture in new ways **Pindar, Song, and Space** Richard Neer,Leslie Kurke,2019-11-05 A groundbreaking study of the interaction of poetry performance and the built environment in ancient Greece Winner of the PROSE Award for Best Book in Classics by the Association of American Publishers In this volume Richard Neer and Leslie Kurke develop a new integrated approach to classical Greece a lyric archaeology that combines literary and art historical analysis with archaeological and epigraphic materials At the heart of the book is the great poet Pindar of Thebes best known for his magnificent odes in honor of victors at the Olympic Games and other competitions Unlike the quintessentially personal genre of modern lyric these poems were destined for public performance by choruses of dancing men Neer and Kurke go further to show that they were also site specific as the dancers moved through the space of a city or a sanctuary their song would refer to local monuments and landmarks Part of Pindar s brief they argue was to weave words and bodies into elaborate tapestries of myth and geography and in so doing to re imagine the very fabric of the city state Pindar s poems in short were tools for making sense of space Recent scholarship has tended to isolate poetry art and

archaeology But Neer and Kurke show that these distinctions are artificial Poems statues bronzes tombs boundary stones roadways beacons and buildings worked together as a suite of technologies for organizing landscapes cityscapes and territories Studying these technologies in tandem reveals the procedures and criteria by which the Greeks understood relations of nearness and distance here and there and how these ways of inhabiting space were essentially political Rooted in close readings of individual poems buildings and works of art Pindar Song and Space ranges from Athens to Libya Sicily to Rhodes to provide a revelatory new understanding of the world the Greeks built and a new model for studying the ancient world

Gregory, 2015-12-31 Pindar's metaphor of the Isthmus as a bridge spanning two seas encapsulates the essence of the place and gives a fitting title for this volume of 17 essays on the history and archaeology of the area The Isthmus best known for the panhellenic Sanctuary of Poseidon attracted travelers both before and after Pausanias's visit in the 2nd century A D but only toward the end of the 19th century were the ruins investigated and a half century later finally systematically excavated More recently archaeologists have surveyed the territory beyond the sanctuary compiling evidence for a varied picture of activity on the wider Isthmus and the eastern Corinthia The essays in this book celebrate 55 years of research on the Isthmus and provide a comprehensive overview of the state of our knowledge Topics include an Early Mycenaean habitation site at Kyras Vrysi the settlement at Kalamianos the Archaic Temple of Poseidon domestic architecture of the Rachi settlement dining vessels from the Sanctuary of Poseidon the Temple Deposit at Isthmia and the dating of Archaic and Early Classical Greek coins terracotta figurines from the Sanctuary of Poseidon the Chigi Painter arms from the age of Philip and Alexander at Broneer's West Foundation on the road to Corinth new sculptures from the Isthmian Palaimonion an inscribed herm from the Gymnasium Area of Corinth Roman baths at Isthmia and sanctuary baths in Greece Roman buildings east of the Temple of Poseidon patterns of settlement and land use on the Roman Isthmus epigraphy liturgy and Imperial policy on the Justinianic Isthmus and circular lamps in the Late Antique Peloponnese

*Studies in Tectonic Culture* Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present Kenneth Frampton's long awaited follow up to his classic *A Critical History of Modern Architecture* is certain to influence any future debate on the evolution of modern architecture *Studies in Tectonic Culture* is nothing less than a

rethinking of the entire modern architectural tradition The notion of tectonics as employed by Frampton the focus on architecture as a constructional craft constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism and suggests a convincing alternative Indeed Frampton argues modern architecture is invariably as much about structure and construction as it is about space and abstract form Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book s analytical framework rests on Frampton s close readings of key French and German and English sources from the eighteenth century to the present He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret Wright Kahn Scarpa and Mies and shows how both constructional form and material character were integral to an evolving architectural expression of their work Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole This is especially evident in his consideration of the work of Perret Mies and Kahn and the continuities in their thought and attitudes that linked them to the past Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant garde A copublication of the Graham Foundation for Advanced Studies and The MIT Press *Art Books* ,1979 Including an international directory of museum permanent collection catalogs **Architecture Series: Bibliography** ,1982 The Grove Encyclopedia of Classical Art and Architecture Gordon Campbell,2007 The Grove Encyclopedia of Classical Art and Architecture spans every art form medium and civilization the fall of the Roman Empire The Grove Encyclopedia of Classical Art and Architecture is a comprehensive reference source on this important field of study Drawing on the expansive scholarship of The Dictionary of Art 1996 34 vols and Grove Art Online and adding dozens of new entries the Encyclopedia includes all subject areas in the classical arts including philosophers rulers writers and artists architecture ceramics sculpture and more Arranged alphabetically this two volume set contains over 800 entries tracing the development of the art forms in classical civilizations such as ancient Greece and Rome Illustrated with 400 halftones maps and line drawings and 32 color plates the Encyclopedia is a reliable and convenient resource covering this field of everlasting significance in the development of western culture
