## Chain Of Chance:

*The Chain of Chance* Stanislaw Lem, 1984-05-11 An ex astronaut investigates a string of potential murders in this novel by the Kafka Prize winning author of *Solaris* Vacation is supposed to be relaxing But while traveling in Naples several American tourists die in a most macabre and unusual way committing suicide in a fit of madness The cases are too similar to be coincidental and the prevailing theory soon assumes that a serial poisoner is on the loose Called in to investigate and stem the rash of death before it becomes an epidemic is a former astronaut from the States As he follows the path of the last victim he is confronted with a mystery that proves the truth is always stranger than fiction and that we are all casualties of fortune in the end Called a Jorge Luis Borges for the Space Age who plays in earnest with every concept of philosophy and physics from free will to probability theory Stanislaw Lem now tackles the suspense genre with his famed intensity and intelligence weaving a taut and enigmatic tale as only a great novelist can *The New York Times Book Review* [The Chain of Chance](#) Stanislaw Lem, 1978 *The Chain of Chance* Stanislaw Lem, 1978-01-01 [Cause and Chance](#) Phil Dowe, Paul Noordhof, 2004-02-24 Philosophers have long been fascinated by the connection between cause and effect are causes things we can experience or are they concepts provided by our minds The study of causation goes back to Aristotle but resurged with David Hume and Immanuel Kant and is now one of the most important topics in metaphysics Most of the recent work done in this area has attempted to place causation in a deterministic scientific worldview But what about the unpredictable and chancey world we actually live in can one theory of causation cover all instances of cause and effect *Cause and Chance Causation in an Indeterministic World* is a collection of specially written papers by world class metaphysicians Its focus is the problem facing the reductionist approach to causation the attempt to cover all types of causation deterministic and indeterministic with one basic theory Contributors Stephen Barker Helen Beebe Phil Dowe Dorothy Edgington Doug Ehring Chris Hitchcock Igal Kwart Paul Noordhof Murali Ramachandran and Michael Tooley **H.O. dialogue with their contemporary literary and artistic representations It thus brings out the central role played by art in the human perception of chance and in our methods for projecting the future in order to better understand contemporary human attitudes in the face of risk *National Miller*, 1923 **The Coast of Chance** Esther Chamberlain, Lucia Chamberlain, 1908
