**German History from the Margins** Neil Gregor, Nils Roemer, Mark Roseman, 2006-06-14 German History from the Margins offers new ways of thinking about ethnic and religious minorities and other outsiders in modern German history. Many established paradigms of German history are challenged by the contributors' new and often provocative findings, including evidence of the striking cosmopolitanism of Germany's 19th-century eastern border communities, German Jewry's sophisticated appropriation of the discourse of tribe and race, the unexpected absence of antisemitism in Weimar's campaign against smut, the Nazi embrace of purportedly Jewish sexual behavior, and post-war West Germany's struggles with ethnic and racial minorities despite its avowed liberalism. Germany's minorities have always been active partners in defining what it is to be German, and even after 1945, despite the legacy of the Nazis' murderous destructiveness, German society continues to be characterized by ethnic and cultural diversity. *Forgotten Streams in the History of 19th-Century German Psychology* Carlos Cornejo, Cristián Hernández Maturana, 2025-05-10 The 19th century was a defining era for psychology, rich with an intellectual diversity that shaped modern thought but which remains largely overlooked. The roots of 20th-century thought can be traced to the 19th century when a mechanical worldview took hold, society grew increasingly secular, modern urban metropolises emerged, and evolutionist ideas reshaped the understanding of nature's developmental principles. Throughout this century, the natural sciences extended beyond their traditional limits, influencing and reshaping the human, moral, and social sciences, among which psychology was especially impacted, as this transformation sparked profound debates on the very possibility of a science of the soul. *Forgotten Streams in the History of 19th Century German Psychology* recovers the vibrant roots of psychology in empiricism, romanticism, idealism, phenomenology, among other streams of thought that explored consciousness, the soul, and the self before experimental psychology took center stage. Unlike the standard view, this book invites readers to reconsider psychology's history, revealing a complex landscape that questions the simplistic story of a linear path toward empiricism. Through profiles of significant yet forgotten thinkers, this work uncovers how their ideas contributed to discussions of the unconscious mind, body duality, and inner experience. Written by leading scholars, each chapter offers a unique window into an intellectual movement that continues to influence debates in psychology, philosophy, and beyond. Essential for historians, psychologists, and anyone curious about psychology's deeper origins, *Forgotten Streams* is an indispensable reference that fills an important gap, enriching our understanding of psychology's complex and multifaceted development. *Building Bridges: Ignaz Goldziher and His Correspondents*, 2024-03-25 The scholarship of Ignaz Goldziher (1850-1921), one of the founders of Islamic studies in Europe, has not ceased to be in the focus of interest since his death. This volume addresses aspects of Goldziher's intellectual trajectory together with the history of Islamic and Jewish studies as reflected in the letters exchanged between Goldziher and his peers from various countries that are preserved in the Library of the Hungarian Academy of Sciences and elsewhere. The thirteen contributions deal with hitherto unexplored aspects of the

correspondence addressing issues that are crucial to our understanding of the formative period of these disciplines
