Challenge To Care In Schools An Alternative Approach To Education:

The Challenge to Care in Schools, 2nd Edition Nel Noddings, 2015-04-26 After a decade of educational reforms The Challenge to Care in Schools is even more relevant now than when it was first published In her new Introduction Nel Noddings revisits her seminal book and places care as central to current debates on standardization accountability privatization and the continuous struggle between traditional and progressive methods of education Rather than forcing one side to yield to the other this book advocates an alternative responsive system that will allow the best ideas to flourish In the Second Edition Noddings once again envisions a school system built on the idea that different people have different strengths and that these strengths should be cultivated in an environment of caring not of competition She suggests that if we make the responsiveness characteristic of caring more basic than accountability we can accommodate both traditional and progressive preferences in one school system to the benefit of all especially the children Chapters address the practical and theoretical questions involved in organizing traditional and nontraditional areas of study around themes of care Introductory chapters focus on caring in general and on the problems of liberal education while the final chapter offers sound advice for implementing a caring curriculum in our schools Praise for the First Edition A welcome addition to the often fragmented discussion of what children need and what school and education should be Harvard Educational Review I recommend this book to all concerned about education personally and or professionally Journal of Moral Education In the morass of school reform that calls for such changes as national standards improved assessments and new ways of organizing schooling Noddings provides lucid thinking about the priorities we ought to consider Teachers College Record

[The Challenge to Care in Schools](#) Nel Noddings, 1992-01-01 This book challenges the traditional organization of high school studies around the academic disciplines Noddings argues that such emphasis shortchanges not only the noncollege bound whose interests are almost ignored but even those who are preparing for college The latter receive schooling for the head but little for the heart and soul Noddings counteracts this condition insisting that our aim should be to encourage the growth of competent caring loving and lovable persons a moral priority that our educational system ignores She argues that liberal education dictates what areas of pedagogy are socially acceptable ignoring a student's wider range of abilities and undervalues skills attitudes and capacities traditionally associated with women Contrarily it is precisely the competence for caring Noddings posits that will prepare our students for the environment of the school the world of work the realm of ideas and ultimately for each other
