# Challenges To Deterrence Resources Technology And Policy

**Stephen J. Cimbala**

## **Challenges To Deterrence Resources Technology And Policy:**

*Challenges to Deterrence* Stephen J. Cimbala, 1987-09-19 Challenge to Deterrence is based on a panel discussion from the 1985 American Political Science Association meeting in New Orleans In this comprehensive study eminent scholars address all aspects of U S deterrence policy from both technical and policy aspects Along with discussions on technology currently available to the U S and how it can be used more effectively contributors speculate on Soviet strategic planning and how the U S can get allies such as Japan and Israel more involved in deterrence activity **Parameters**, 1988 **Special Bibliography Series**, 1957 *Rethinking national security* Frances Scott, 1990 **Arms Control, Disarmament and International Security**, 1987 **Choice**, 1988 *Security, Arms Control, and Conflict Reduction in East Asia and the Pacific*, 1993-07-30 This is the most comprehensive bibliography to date on the vast English language literature covering the myriad aspects of peace and security issues in the East Asia Pacific region McClean contacted 150 key research institutions and publishers around the world for information about the most significant books articles dissertations and official documents on international and intra state security arms control conflict avoiding diplomacy and militarization in the area He has selectively annotated 12 645 cross referenced entries and organized them into 27 sub regional and country chapters including two particularly extensive chapters on Japan and China and two further chapters on relations between Australia New Zealand and the United States and on U S and Soviet policy *Arms Control Today*, 1989 *Nuclear Endings* Stephen J. Cimbala, 1989-03-13 If a nuclear war between American and Soviet forces or the forces of their allies were to start how would it end This sobering analysis one of the few published treatments of War termination identifies the policies and strategic issues involved in the attempt to control and end a nuclear war should one ever start The author presents both a comprehensive overview of the theory of war termination and a broad based analysis of the specific aspects of the question Throughout the aim is to provide policymakers and students of military strategy with a tool for improved strategic war planning that emphasizes the importance of flexibility and durability rather than the current emphasis on damage infliction Cimbala begins by discussing the compelling reasons for studying war termination among them the potential deterrent value of such study He then introduced pertinent issues in the literature of war termination including the notion of an agreed battle escalation control intrawar deterrence and coercive diplomacy The bulk of the study is devoted to a detailed discussion of specific aspects of nuclear war determination In his concluding chapter Cimbala integrates these aspects into a coherent theory of nuclear war termination and assesses the potential implications of strategic defenses for American nuclear deterrence strategies **SAIS Review**, 1989 Dedicated to advancing the debate on leading contemporary issues of world affairs Seeks to bring a fresh and policy relevant perspective to global political economic and security questions **Central Europe's Fragile Deterrent Structure** James M. Garrett, 1990 *The Nuclear Present* Grant Burns, 1992 thorough and complete well written annotations recommended to libraries at all levels **CHOICE** An exceptionally thorough guide **JOURNAL**

OF AMERICAN HISTORY      Conflict Termination in Europe Stephen J. Cimbala, 1990-10-30 An important contribution to the international relations and military studies literature this study considers the problem of conflict termination in Europe an area of immense strategic importance to both the United States and the Soviet Union The author argues that a well thought out policy for conflict termination is lacking within the NATO alliance which currently relies almost exclusively on policies that emphasize the prevention of war This lack of a conflict termination strategy Cimbala asserts leaves nations open to the danger of a quickly escalating nuclear conflict should prevention policies fail and a war in Europe actually occur In developing his arguments Cimbala considers the relationship between war and politics as perceived by Soviet and Western planners compares the superpowers likely views on the process of escalation and assesses the command control and communications perspectives implicit in Soviet and American writings and deployments and their implications for war termination Cimbala begins with an overview of the problems and choices involved in ending war in Europe under contemporary conditions Subsequent chapters examine such topics as the philosophical and practical issues related to the problem of preemption the problem of military stability and its specific applications to modern Europe and Western and Soviet approaches to the escalation and limitation of war Soviet perspectives on command and control as well as the Soviet view of war termination receive extended treatment in two chapters Finally Cimbala contrasts the orthodox view of mutual assured destruction with the strategic revisionism of defense dominance or mutual assured survival He concludes that policymakers and military planners must recognize that nuclear weapons will almost certainly be a part of any war in Europe and that termination must focus on limiting the use of these weapons before the pressures of in the field escalation tendencies begin to work against the early conclusion of a conflict Students and scholars of military policy will find Cimbala's work enlightening and provocative reading

The Superpowers and Nuclear Arms Control Dennis Menos, 1990-04-23 The nuclear arsenals of the United States and the Soviet Union are larger better equipped and deadlier than at any other time in history This incisive book contends that the superpowers while exhibiting enormous ingenuity in the area of arms development have shown only a minimal interest toward the containment of arms This is a carefully documented evaluation of the mismanagement of nuclear arms control by the superpowers and of their failure to contain the nuclear arms race despite their involvement in the process for over a quarter of a century Only the superpowers can reduce the proliferation of nuclear arms and in the process lessen the likelihood of nuclear war through accident miscalculation or crisis escalation Yet forty four years after Hiroshima not a single unwanted nuclear weapon has been eliminated by them The Superpowers and Nuclear Arms Control addresses a broad spectrum of nuclear arms control issues beginning with the history of the nuclear arms race the lukewarm attempts by the superpowers at nuclear arms control and the role of the nuclear havenots The book then considers current threats to arms control evidenced by the termination of the SALT regime and plans to discard the ABM Treaty A discussion of the congressional executive split on numerous key arms control issues is followed by conclusions

drawn from observing decades of negotiation Comprehensive appendices contain valuable charts and other documents that reinforce the content of the text This resource is a useful tool for arms control and disarmament activists students and researchers and for the many men and women everywhere who are at a loss to understand why so little is being accomplished in this critical area

**Proceedings of the United States Naval Institute** United States Naval Institute,1989-05

**Japan to the Rescue** Humphrey McQueen,1991 Examines Australia s relationship with Japan and the need to reconsider our historical attitudes with both Japan and the USA in the context of regional stability and defence Includes a detailed bibliography The author is a freelance historian widely known for his writings and radio commentaries
