Welcome to your next level International Relations and the Challenge of Postmodernism D. S. L. Jarvis, 2021-11-24

Assesses current poststructural and postmodern theories and defends international relations as a discipline Promising to  
stimulate discussion among both those who celebrate the arrival of the Third Debate and those who fear its colonialization  
and spread D S L Jarvis offers an innovative appraisal of the various postmodern and poststructural theories sweeping the  
discipline of international relations Citing the work of Richard Ashley Jarvis explores the lineage of postmodern theory its  
importation into international relations and its transformation from critical epistemology to subversive and deconstructive  
political program Inspired by a deep seated concern that theory in international relations is becoming increasingly abstract  
and unrelated to the subject matter scholars strive to understand Jarvis argues that much postmodern and  
poststructural theory has impoverished our theoretical understanding of global political relations embroiling us in  
incommensurate discourses and research agendas driven by identity politics By developing a series of critical typologies to  
assess postmodern and poststructural theories Jarvis mount a ringing defense of the discipline's existing research methods  
and epistemologies and he suggests that more harm than good has come of the epistemological subversion occasioned by the
