Organizing Political Parties Susan E. Scarrow,Paul D. Webb,Thomas Poguntke,2017-06-23 Political party organizations play large roles in democracies yet their organizations differ widely and their statutes change much more frequently than constitutions or electoral laws How do these differences and these frequent changes affect the operation of democracy This book seeks to answer these questions by presenting a comprehensive overview of the state of party organization in nineteen contemporary democracies Using a unique new data collection the book s chapters test propositions about the reasons for variation and similarities across party organizations They find more evidence of within country similarity than of cross national patterns based on party ideology After exploring parties organizational differences the remaining chapters investigate the impact of these differences The volume considers a wide range of theories about how party organization may affect political life including the impact of party rules on the selection of female candidates the links between party decision processes and the stability of party programmes the connection between party finance sources and public trust in political parties and whether the strength of parties extra parliamentary organization affects the behaviour of their elected legislators Collectively these chapters help to advance comparative studies of elections and representation by inserting party institutions and party agency more firmly into the centre of such studies Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow Chair of the Department of Political Science University of Houston **Democracy within Parties** Reuven Y. Hazan,Gideon Rahat,2010-07-01 Can too much participation harm democracy Democratic theory places great importance upon the conduct of elections but it is not often recognized that the electoral game takes place in two arenas not only between parties but also within them This pioneering book presents a new approach to understanding political parties It sheds light on the inner dynamics of party politics and offers the first comprehensive analysis of one of the most important processes any party undertakes its process of candidate selection Candidate selection methods are the mechanisms by which a party chooses its candidates for the general elections It may be the function that separates parties from other organizations For such an important function this field has certainly faced a dearth of serious investigation Hazan and Rahat the leading scholars on this topic conduct an in depth analysis of the consequences of different candidate selection methods on democracy This book is a culmination of almost two decades of

research and defines the field of candidate selection Part I of the book delineates candidate selection methods based on four major dimensions candidacy the selectorate decentralization and voting versus appointment systems Part II analyses the political consequences of using different candidate selection methods according to four important aspects of democracy participation representation competition and responsiveness The book ends with a proposed candidate selection method that optimally balances all four of the democratic aspects concurrently and answers the question Is the most participatory candidate selection method necessarily the best one for democracy Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.essex.ac.uk/ecpr The General Editor is Professor David M Farrell School of Politics and International Relations University College Dublin The Routledge Handbook of Political Parties Neil Carter, Daniel Keith, Gyda M.
