Change In Britain:

Political Change in Britain David Butler, Donald Stokes, 1969-06-18 Changing Britain, Changing Lives Elsa Ferri, John Bynner, Michael Wadsworth, 2003 This book provides a unique insight into social change in Britain in the second half of the twentieth century It draws on three internationally renowned British birth cohort studies based on tracking samples of people born in one week in 1946 1958 and 1970 through surveys from birth through childhood and adolescence and into adulthood In 1999 2000 all three cohorts were surveyed in the same period which provided the first ever opportunity for a direct comparison of the lives of the three groups of people The contrasts between the cohorts have been striking and have revealed the effects of social and educational change as well as differences in health A generational shift has taken place towards more uncertain adult careers and marriage and parenthood postponed or rejected Rich and poor have become increasingly polarised and those without resources face social exclusion Each chapter in Changing Britain Changing Lives covers a major aspect of life family and parenting qualifications and employment income and living standards physical and mental health life styles and health behaviour citizenship and social participation and is written by leading analysts in that area The book will be a valuable resource for those working in education the social sciences community medicine and epidemiology and for anyone who seeks insight into the changing conditions of life in Britain today

Britain's Changing Roadscapes Lynne Pearce, 2026-02-06 The book addresses long standing geographical debates on place place attachment and kin aesthetics as well as the unique spatial temporal properties of journeying Drawing upon the author's road diaries and photographic archive dating back to the 1990s the analysis centres on a route that runs from Scotland to Cornwall and which incorporates motorways A roads and unclassified country lanes In addition to seeking to capture material evidence of change across a wide variety of road features and driving events many of them transient incidental and mundane the book is also concerned with how change makes its presence known to the observer This includes the question of how and why road users sometimes develop powerful attachments for particular routes and roadside landmarks To this end the analysis is in conversation with recent debates in contemporary archaeology the aesthetics of the everyday and geographical research on dis orientation as well as Henri Bergson's foundational work on the phenomenology of perception and memory And yet it is the restless teeming life of the British roads featured in the case studies the A30 the A82 the M5 the M6 the M74 and Cornwall's narrow winding lanes that makes this book memorable especially given that post millennium many of the changes to which it bears witness are epic in consequence Congestion electrification automation the arrival of SMART motorways and extreme weather events arising from climate change all feature here alongside the disappearance of the roadside cafes filling stations phone boxes lay bys and snack bars associated with twentieth century motoring This interdisciplinary exploration of Britain's changing roads and roadscapes will appeal to academics and students working in and across the fields of social and cultural geography mobilities studies cultural history literary and cultural

theory and contemporary archaeology Its autoethnographic case studies historical route descriptions photographic archive and general accessibility mean that it may also be of interest to road enthusiasts and the general reader
