Changing Climate :

Changing Climate and Resource use Efficiency in Plants Amitav Bhattacharya, 2018-11-01 Changing Climate and Resource Use Efficiency in Plants reviews the efficiencies for resource use by crop plants under different climatic conditions. This book focuses on the challenges and potential remediation methods for a variety of resource factors. Chapters deal with the effects of different climatic conditions on agriculture: radiation use efficiency under various climatic conditions, the efficiency of water and its impact on harvest production under restricted soil moisture conditions, nitrogen and phosphorus use efficiency, nitrogen use efficiency in different environmental conditions under the influence of climate change, and various aspects of improving phosphorus use efficiency. The book provides guidance for researchers engaged in plant science studies, particularly Plant Crop Physiology, Agronomy, Plant Breeding, and Molecular Breeding. In addition, it provides valuable insights for policymakers, administrators, plant-based companies, and agribusiness companies. Explores climatic effects on agriculture through radiation, water, nitrogen, and phosphorus use efficiency. Guides the planning and research of and recommendations for fertilizer application for different crops under various climatic conditions. Discusses efficiency improvements for plant and molecular breeders seeking to maximize resource use.

Sustainable Goat Production in the Changing Climate

Veerasamy Sejian, M.V. Silpa, D. Thirunavukkarasu, 2025-06-01 Sustainable Goat Production in the Changing Climate aims to make the global scientific and academic communities aware of the potential of goats as a livestock of the future. When compared to more popular meat sources like cattle and swine, goats have a lower carbon footprint and can aid in mitigating the effects of climate change as well as improving food production, poverty, and equity issues. This book will discuss the implications of climate change on goat production systems and emphasize the physiological potential of goats to adapt to erratically changing climatic conditions. Furthermore, the book includes chapters on strategies to mitigate the effects of climate change on goat production and highlights novel technologies used to assess the impact of heat stress in goats. Technology transfer strategies and policy-related issues will also be covered. Written and edited by an international team of experts on goats, livestock, animal agriculture, and climate-smart food systems, Sustainable Goat Production in the Changing Climate will appeal to a broad audience from researchers to livestock specialists, veterinarians, and policymakers in food and sustainability. Explores the potential of goats as future livestock species for animal origin foods. Summarizes the impact of climate change on goats and goat production systems. Proposes technological interventions ranging from management to biotechnological solutions. Identifies gaps in technology transfer activities and policymaking and provides solutions.

Floods in a Changing Climate Slobodan P. Simonović, 2012-11-22 Flood risk management is presented in this book as a framework for identifying, assessing, and prioritizing climate-related risks and developing appropriate adaptation responses. Rigorous assessment is employed to determine the available probabilistic and fuzzy set-based analytic tools when each is appropriate and how to apply them to practical problems. Academic researchers in the fields of hydrology, climate change, environmental

science and policy and risk assessment and professionals and policy makers working in hazard mitigation water resources engineering and environmental economics will find this an invaluable resource This volume is the fourth in a collection of four books on flood disaster management theory and practice within the context of anthropogenic climate change The others are Floods in a Changing Climate Extreme Precipitation by Ramesh Teegavarapu Floods in a Changing Climate Hydrologic Modeling by P P Mujumdar and D Nagesh Kumar and Floods in a Changing Climate Inundation Modelling by Giuliano Di Baldassarre
