Changing Relations

Bertrand Russell

Changing Relations:

Changing Relations of Welfare Åsa Lundqvist, 2016-04-15 *Changing Relations of Welfare* is concerned with the complexities of family relations and practices in the recent past and how these have been imagined addressed or elided in present policy making It uses rich and varied sources to offer an innovative approach to the analysis of meanings afforded to the family in different policy legal and welfare contexts in Sweden Denmark and Britain This book considers how debates about responsibility obligation and rights have been gendered in social policy and welfare practice whilst also focusing upon the intersections of family gender race and ethnicity and the different ways in which legislation and policy in northern Europe have been used to regulate not only immigration but also the lives of migrant families Presenting a historically informed comparative analysis of the shifting dynamics in the relationship between family and the state this volume offers new pathways for exploring questions of change and continuity

Towards European Science Linda Wedlin, Maria Nedeva, 2015-12-18 Since the European Research Area was launched at the beginning of the century significant efforts have been made to realise the vision of a coherent space for science and research in Europe But how does one define such a space and measure its development This timely book analyses the dynamics of change in the policy and governance of science and research within Europe over the past decade It widens the scope of traditional policy analysis by focusing attention on the interaction between policy rationales new governance mechanisms and the organisational dynamics of the scientific field The contributors build a novel analytical framework to understand the European research space as one shifting from a fragmented space of Science in Europe to one that is labeled European Science The chapters explore the dynamics of this shift through the lenses of political science organisation theory science policy and related analytical traditions Towards European Science is an interdisciplinary book which will attract a wide set of scholars and professionals interested in science policy governance and scientific practice It

will also be of use to university leaders and managers as well as policy makers and practitioners working on issues of internationalisation and the Europeanisation of science

Temporal Points of View Margarita Vázquez Campos, Antonio Manuel Liz Gutiérrez, 2015-08-14 This book seeks to arrive at a better understanding of the relationships between the objective and subjective aspects of time It discusses the existence of fluent time a controversial concept in many areas from philosophy to physics Fluent time is understood as directional time with a past a present and a future We experience fluent time in our lives and we adopt a temporal perspective in our ways of knowing and acting Nevertheless the existence of fluent time has been debated for both philosophical and scientific reasons thus creating a rift between the subjective and objective aspects of time Starting from the basic notion of points of view or perspectives this book explores the relationships between objective or external time as it has been conceptualized by science and subjective or internal time which is involved in our lived experiences It establishes a general framework encompassing the nature structure and mode of existence of points of view in which the objective and subjective aspects of time can be integrated The book mainly addresses researchers and postgraduates in philosophy and logic Additionally it offers inspiration for physicists and computer scientists involved in the modeling and simulation of complex behaviors for which the representation of internal time should be considered together with the notion of objective external time
