GIScience Monika Sester, Lars Bernard, Volker Paelke, 2009-04-22 The Association of Geographic Information Laboratories for Europe AGILE was established in early 1998 to promote academic teaching and research on GIS at the European level Since then the annual AGILE conference has gradually become the leading GIScience conference in Europe and provides a multidisciplinary forum for scientific knowledge production and dissemination GIScience addresses the understanding and

automatic processing of geospatial information in its full breadth While geo objects can be represented either as vector data or in raster formats these representations have also guided the research in different disciplines with GIS researchers concentrating on vector data while research in photogrammetry and computer vision focused on geospatial raster data Although there have been small but fine sessions addressing photogrammetry and image analysis at past AGILE conferences these topics typically played only a minor role Thus to broaden the domain of topics the AGILE 2009 conference is jointly organized with a Workshop of the International Society of Photogrammetry and Remote Sensing ISPRS dedicated to High Resolution Satellite Imagery organized by Prof Christian Heipke of the Leibniz Universität Hannover This collocation provides opportunities to explore commonalities between research communities and to ease exchange between participants to develop or deepen mutual understanding We hope that this approach enables researchers from the different communities to identify common interests and research methods and thus provides a basis for possible future cooperations
